**VAN INGRAM**  
EXECUTIVE DIRECTOR

February 1, 2014

The Honorable Steven Beshear, Governor  
The Honorable Jerry Abramson, Lt. Governor  
Commonwealth of Kentucky  
The State Capitol  
Frankfort, Kentucky 40601

Dear Governor Beshear and Lt. Governor Abramson:

Since the establishment of this office on July 9, 2004, by Executive Order 2004-730, we have been responsible for all matters relating to the research, coordination and execution of drug control policy for the Commonwealth, while directing state and federal grants management that focus on prevention/education, enforcement and treatment efforts.

The ODCP is proud to coordinate Kentucky's response to substance abuse through prevention, treatment and law enforcement. Our goal is to change the way substance abuse is handled in Kentucky and reduce the problem, making the Commonwealth a model for other states.

We continue to work toward significant goals that will strengthen our position to fight drugs in our state through innovative partnerships, technology and leadership.

This report focuses on the 2013 accomplishments of ODCP and the Kentucky Agency for Substance Abuse Policy (KY-ASAP) and the advances of other major partners in the drug abuse system. We continue to strengthen our partnerships within our Cabinet, Cabinet for Health and Family Services, Kentucky Attorney General Jack Conway, Environmental and Public Protection Cabinet, and across the state with coalitions and local boards, the law enforcement community, substance abuse treatment providers, prevention agencies and other stake holders.

We have joined prevention, treatment and law enforcement in a united effort to confront this epidemic and we have made great strides. As we plan for the future, we know the success of our initiatives depends on the involvement and support of our communities. We must tap into the resources of our families, local leadership and citizens to help reach our goals.

Although there is much to do on the substance abuse front, we have only just begun to make progress and will continue to do so with your support and that of the General Assembly who have been resolute in our effort to make Kentucky a safer place for the citizens of the Commonwealth.

Sincerely,

Van Ingram  
Executive Director

# Executive Summary

---

During the 2006 General Assembly, the Office of Drug Control Policy was enabled as the result of the reorganization of the Justice and Public Safety Cabinet. The enabling legislation designates the Office of Drug Control Policy to be responsible for all matters relating to the research, coordination, and execution of drug control policy and for the management of state and federal grants including but not limited to the prevention and treatment related to substance abuse. *By December 31 of each year, the Office of Drug Control Policy shall review, approve, and coordinate all current projects of any substance abuse program which is conducted by or receives funding through agencies of the executive branch. This oversight shall extend to all substance abuse programs which are principally related to the prevention or treatment, or otherwise targeted at the reduction of substance abuse in the Commonwealth.*

This report is intended to fulfill the statutory obligation listed above.

As this report reflects there are many ongoing projects throughout state government attempting to prevent and diminish substance abuse.

The majority of the programs are administered by the Division of Mental Health and Substance Abuse in the Cabinet of Health and Family Services. There are prevention and enforcement programs throughout the Justice and Public Safety Cabinet as well as the Alcoholic Beverage Control division. This report highlights the successful ongoing efforts of the Kentucky Agency for Substance Abuse Policy, law enforcement, and all other state agencies addressing substance abuse crisis.

# Overarching Themes

---

## Core Principles

- Coordination of federal, state and local government efforts is essential for effectiveness
- Collaboration and communication among key stakeholders and agencies is vital for success
- Mobilizing community initiatives is effective in addressing substance abuse
- Utilizing multiple funding streams yields improved results
- Treatment, when available, works in healing lives, families and communities
- Preventing the onset of alcohol, tobacco and illicit drug use among youth is paramount to the reduction of demand

## Overarching Goals

- Establish multi-jurisdictional enforcement efforts that contain a local, state and coordinate, and when possible, integrate publicly funded prevention, treatment and enforcement efforts
- Reduce the demand for prescription & illicit drugs in Kentucky
- Reduce the supply of prescription & illicit drugs in Kentucky
- Promote the implementation of evidence-based strategies that target youth and adults
- Reduce the stigma associated with alcohol and drug addiction
- Promote safer communities and family stability
- Promote and support legislative efforts to address and fund alcohol, tobacco and other drug use/abuse initiatives
- Increase access to substance abuse treatment

## Trends

---

In the first time in over a decade controlled substance dispensing, has dropped significantly.

Drug	August 2011 through July 2012	August 2012 through July 2013	Change
Hydrocodone	239,037,354	214,349,392	-10.3%
Oxycodone	87,090,503	77,022,586	-11.6%
Oxymorphone	1,753,231	1,138,817	- 35.0%
Alprazolam	71,669,411	62,088,568	-13.4%
All Controlled Substances	739,263,679	676,303,581	-8.5%

The percentage of Kentucky teens using prescription drugs for off-label purposes has dropped dramatically over the past four years, a new survey has found.

The 2012 Kentucky Incentives for Prevention (KIP) School Survey found that use of prescription drugs without a doctor's specific direction to do so has decreased steadily among sixth-, eighth-, 10th- and 12th-graders since 2004. The declines have been the most significant since 2008, when the Commonwealth intensified its efforts to combat prescription drug abuse.

According to the survey, 9 percent of 12th-graders reported using prescription drugs without a doctor telling them to do so in 2012, down from 15.2 percent in 2008. For 10th-graders, the percentage was 7.6 percent in 2012, versus 14.1 percent in 2008.

Off-label use among younger students declined as well. Among eighth-graders, usage dropped to 2.9 percent in 2012 compared to 6.5 percent in 2008; and less than 1 percent of sixth-graders reported using the medications without a doctor's direction in 2012, versus 2 percent who said they had in 2008.

Additionally, the report found that nearly every other area surveyed – including alcohol, tobacco, Oxycontin, cocaine and hard drug usage – had declined between 2008 and 2012.

Marijuana usage, however, remained the same or ticked up slightly among teens during that same time period.

The KIP survey is implemented by the Division of Behavioral Health and measures drug use, school safety issues and gambling. One hundred and fifty three out of 174 school districts participate in the survey. In 2012, 122,718 students participated.

House Bill 1 (HB1) is landmark legislation, is credited with closing non-complaint pain management clinics and reducing the number of prescriptions for heavily-abused controlled substances. Plus, for the first time in a decade, the number of deaths blamed on prescription overdoses has declined.

Of the 1,004 overdose fatalities in 2012, 888 were found to be unintentional, 59 were suicides and 57 remain undetermined, according to the report. In 2011, there were 1,023 overdose deaths in Kentucky.

The data, contained in the 2012 Overdose Fatality Report, was compiled from the Kentucky Medical Examiner's Office, the Kentucky Injury Prevention and Research Council and the Kentucky Office of Vital Statistics. The report was mandated under a provision in HB1.

Alprazolam (Xanax) remained the most-detected controlled substance in overdose deaths, present in 41 percent of all autopsied cases. Morphine was found in 32 percent of autopsies, followed by hydrocodone at 26 percent and oxycodone at 24 percent.

Kentucky clearly grew tired of serving as one of the nation's best examples of how NOT to stem the tide of prescription drug abuse. HB1 is working and that's just not great news for the Commonwealth, but for several other states who modeled their own legislation after HB1. In Kentucky, this past year, persons among the age of 18 to 25, the rates of the nonmedical use of pain relievers declined along with 13 other states. Those states include Florida, Louisiana, Maine, Massachusetts, Michigan, New Hampshire, New York, Ohio, Oklahoma, Rhode Island, Texas, Utah, and West Virginia.

In addition to prescription drug and heroin abuse, we are also watching the newest drug on the market, Zohydro. In October 2013, the FDA went against the recommendation of its own advisory committee and approved the powerful, first hydrocodone-only narcotic painkiller Zohydro (hydrocodone bitartrate).

Zohydro ER will come in doses packing five to ten times more heroin-like narcotic than traditional hydrocodone products. In addition, it is designed to be released slowly over 12 hours, pleasure-seekers will be able to crush it, chew it, or mix it

with alcohol to unleash its full punch at once because the drug does not have an abuse-limiting formulation.

Zohydro has the potential to exacerbate the prescription pill epidemic for a state that has been hit hard by opioid abuse.

## Top Prescribed Controlled Substances by Therapeutic Category by Doses - 2013

Cabinet for Health and Family Services

# Heroin

---

Heroin has had a resurgence in our nation and Kentucky is no exception. Especially hit hard have been Northern Kentucky, Louisville, and Lexington raising fears that a heroin scourge will soon ravage the entire Commonwealth.

Heroin – known by the nicknames such as Black Tar, Big H. Dog, Horse, and Puppy Chow, is a highly addictive drug derived from morphine, which is obtained from the opium poppy. Heroin can be injected, smoked in a water pipe, inhaled as smoke through a straw, or snorted as powder through the nose.

Police in Louisville and the Northern Kentucky suburbs of Cincinnati said they began seeing more heroin as early as four years ago, but it was in the last 12 months that heroin had increased dramatically.

A key driver behind the uptick in heroin abuse was the reformulation of two widely abused prescription pain drugs, making them harder to crush and snort. Drug manufacturers reformulated OxyContin in 2010 and Opana in 2011.

A growing number of young people who began abusing expensive prescription drugs are switching to heroin, which is cheaper and easier to buy. The reason may come down to basic economics: illegally obtained prescription pain killers have become more expensive and harder to get, while the price and difficulty in obtaining heroin have decreased. An 80 mg OxyContin pill runs between \$60 to \$100 on the street. Heroin costs about \$9 a dose. Even among heavy heroin abusers, a day's worth of the drug is cheaper than a couple hits of Oxy.

Statewide heroin overdose deaths increased by 650 percent last year and the trend appears to be continuing. As of this date, there were 876<sup>1</sup> total overdose deaths reported; with 27% of those deaths having heroin in their bloodstream. There were 1,567 heroin trafficking charges statewide from January 1, 2013 to September 30, 2013.

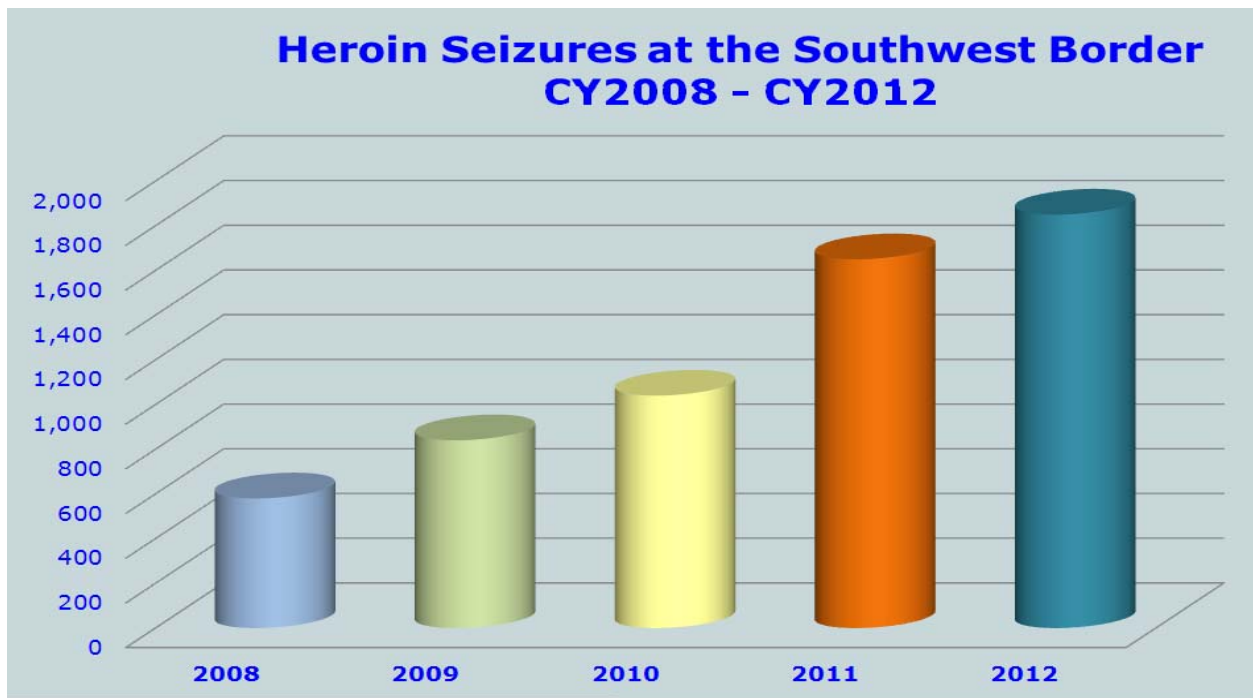

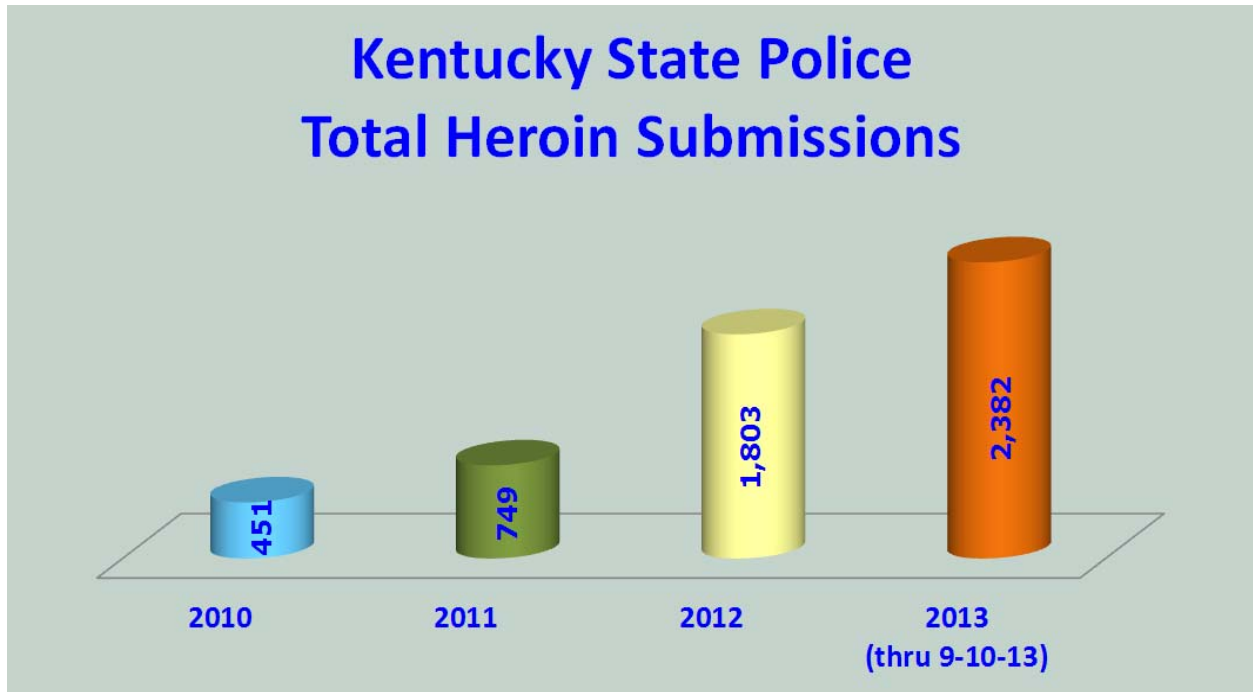

To impact the problem, the Kentucky Office of Drug Control Policy will continue to work towards increased public education, increased access to treatment, enhanced penalties for major traffickers, and greater access to naloxone.

---

<sup>1</sup> As of the date of this report the 2013 final overdose death statistics were not yet available.

# 2013 Symposia for Medical Professionals

These free "[Kentucky Medical Communities UNITEd](#)" forums were jointly sponsored by the University of Kentucky, Operation UNITE, Appalachian Regional Commission, Kentucky Office of Drug Control Policy and Kentucky Coalition of Nurse Practitioners & Nurse Midwives.

Among topics discussed were the new key requirements imposed by the 2012 Kentucky General Assembly (HB 1) and amendments enacted, identification of drug abuse and dependence in patients, assessing patients for addiction risk, explaining the KASPER (Kentucky All-Schedule Prescription Electronic Reporting) system, and evaluating the risks versus rewards of opioid therapy.

Participants in the training forums were eligible to receive 4.5 continuing education credit hours for physicians, physician assistants, nurses, nurse practitioners, dentists, dental hygienists, pharmacists, social workers, Certified Alcohol and Drug Counselors, psychologists and Certified Health Education Specialists.

The trainings were approved by the Kentucky Board of Medical Licensure, Kentucky Board of Nursing, and Certified Health Education Specialists as meeting statutory requirements imposed by House Bill 1.

Prescription drugs cause more overdose deaths than all other substances combined including cocaine, methamphetamine, and heroin. To address this increasing problem, the Kentucky Legislature enacted **House Bill 1** in 2012 followed by **House Bill 217** in 2013. Measured impacts have seen the total doses of all controlled substances dropping over 10%, several facilities identified as pain management clinics closing or discontinuing providing pain management services, and KASPER utilizations have dramatically increased.

The modules of the symposium were intended to help the prescriber identify and screen for substance use disorders, use KASPER and urine drug testing therapeutically, recommend and understand treatment options particularly for vulnerable populations such as opioid dependent pregnant women, and improve their medical understanding of addiction as a chronic relapsing illness deserving of medical treatment.

## **Overview of HB1 and Regulations – C Lloyd Vest II, JD**

In 2012, HB1 established new procedures for the Board of Medical Licensure, established new requirements for physicians, required specific sanctions for certain conduct, required the Board to set out prescribing/dispensing standards in regulations, and established ownership and other requirements for pain management facilities.

## **How to Recognize Drug Abuse and Dependence in Patients - Gregory L. Jones, MD**

Addiction is a common disease. It is frequently diagnosed late in the course or not at all. A high index of suspicion is necessary. It carries much misunderstanding and stigma as well. Reduction of the stigma is needed. Better screening and early referral for specialized treatment are also needed.

## **How to Discuss Drug Issues With a Patient – Gregory L. Jones, MD**

Many healthcare professionals are uncomfortable discussing alcohol and drug use with their patients. Optimal healthcare requires this information for good clinical decisions. All providers need to improve their comfort and skill set in having these discussions.

## **An Update on KASPER - Post House Bill 1 – David R. Hopkins, BS**

Controlled substance prescribers and dispensers in Kentucky may not be fully aware of legislative changes affecting their use of the Kentucky All Schedule Prescription Electronic Reporting (KASPER) system. This training is intended to provide medical professionals with a more comprehensive understanding of KASPER operation and features as well as to provide information on legislative updates.

## **Opioid Therapy: Risks vs. Rewards – Gregory L. Jones, MD**

Opiate use is widespread in the management of chronic pain and is frequently the only modality applied. Optimally, opiate use would not be first line treatment and would be used only in conjunction with other modalities. There is a need for better understanding of the nature and optimal management of chronic pain.

# The Good, Bad, and Ugly of Addiction

August 3, 2013 \* Lexington, KY

---

Substance use disorders are common medical disorders of which all health care providers should be aware, have basic knowledge about, and practice competence in order to screen, refer, and/or treat. Prescribers as well as non-prescribing health care providers need training in substance use disorders, urine drug screening and testing, and therapeutic use of KASPER. The latter two are practice behaviors that are required by law for prescribers of several controlled substances in Kentucky.

[This activity was jointly sponsored by the University of Kentucky, Operation UNITE, Appalachian Regional Commission, and Kentucky Office of Drug Control Policy.](#)

## **Prescription Drug Abuse and Other Risky Behaviors in Rural Appalachia – Jennifer R. Havens, PhD, MPH**

Drug abuse and related harms in rural Appalachia in the context of social network formation is a very real problem. Data presented will raise awareness about the medical consequences of prescription drug abuse, including injection drug use and infectious disease transmission. Data on overdose and treatment seeking will be presented.

## **Substance Abuse Treatment as an Integral Part of the Health Care System – Kelly Clark, MD, MBA**

There is inadequate utilization of the most appropriate treatment for prescription drug abuse. There is a lack of understanding of costs of untreated and treated prescription drug addiction and of the levels of care for treatment.

## **Methadone and Buprenorphine: Evidence-base in Addiction Treatment and Common Pitfalls and Myths – Michelle R. Lofwall, MD**

Substance use disorders are common medical disorders that all health care providers should be aware of and have basic knowledge and practice competence. Methadone and buprenorphine are important treatment options that can help bring treatment back into main stream medical practice.

## **Treating Opiate Addiction in Pregnancy: How We Got Here and Are We There Yet? – Jonathan W Weeks, MD**

Substance use disorders are increasing in pregnant patients. Health care providers should be aware and have basic knowledge of treatment options for these patients to improve patient and fetal health.

## **Neonatal Drug Withdrawal: A Clinical Primer – Lori A Devlin-Phinney, DO, MHA**

The prevalence estimates for prenatal substance use vary widely and are difficult to establish. The 2011 National Survey on Drug Use & Health states that 5% of pregnant women between 15-44 years old used illicit drugs during the past month. Infants who have been identified as having been drug exposed in utero need a

pediatric medical home in which they can easily receive regular growth and nutritional assessments, evaluation for developmental and social/emotional delays, and close follow-up for subtle signs of neglect and abuse.

**Therapeutic Use of KASPER and Urine Drug Screening and Testing in Clinical Practice – Michelle R Lofwall, MD**

KASPER and UDS/T can be used as therapeutic clinical tools to help monitor for unintended adverse effects of prescribed opioids (and other controlled drugs with known abuse potential and increasing presence in overdose death cases such as the opioids and benzodiazepines) and to help health providers not be unintentional sources of diverted medications. This process can get providers talking more to patients (and their family/friends) about the need for safe storage, diversion, misuse, and substance use disorder that impacts patients and public health.

**The Front Line of Health Care and Drug Abuse – Ryan A Stanton, MD**

Patients with substance abuse disorders are increasingly coming to the Emergency Department for treatment. Prescribers need to be aware of how substance abuse is a co-factor in other medical conditions and be able to identify aberrant patient behaviors in the Emergency Department.

**A Harm Reduction Strategy: Expanding Access to the Opioid Antidote Naloxone – Daniel P Wermeling, PharmD, FCCp, FASHP**

Naloxone, the opioid antidote, is under-utilized in the prevention and treatment of opioid overdose. Health care professionals caring for and families of high overdose risk patients can reduce overdose morbidity and mortality by learning new ways to prescribe, dispense, and administer naloxone.

## Law Enforcement – Drug Task Forces

---

Kentucky's law enforcement community continued to perform at a high level during 2013. The Office of Drug Control Policy was instrumental in bringing law enforcement agencies together to share intelligence, resources and collaborate on significant drug investigations.

The Kentucky Justice and Public Safety Cabinet also provides grant funding for 12 multi-jurisdictional drug task forces. During 2013, standards, model policies and best practices for drug task force operations continued to be evaluated and reviewed and ensure program compliance. The Office of Drug Control Policy in conjunction with the Grant's Management Branch, conducted annual audits and on-site inspections with all grant recipients and ensure program compliance.

Many of Kentucky's police departments and sheriff's offices conduct drug investigations on a daily basis. Although they may not be part of a formalized drug task force, there is still a great deal of collaboration and cooperation that occurs between federal, state and local agencies. Many local law enforcement agencies have detectives assigned exclusively to formalized drug task forces. This section highlights the agencies and their contributions to drug enforcement.

Kentucky's Drug Task Forces have been instrumental in reducing the manufacturing of methamphetamine in rural and urban areas, reducing the illegal distribution of prescription drugs and the growth and distribution of marijuana.

## Law Enforcement – Partnerships

---

The Office of Drug Control Policy has many partners at the state, local and federal levels of enforcement. Without effective partnerships, the drug enforcement initiatives would suffer in efficiency. The opportunity to share manpower, information and resources is invaluable to successful operations. The ODCP works very closely with all of the partners listed below.

### •**Drug Enforcement Administration**

The United States Department of Justice, DEA is the primary federal law enforcement agency in the United States charged with enforcing federal narcotic laws.

### •**Appalachia HIDTA**

Appalachia HIDTA (High Intensity Drug Trafficking Area) was designated in 1998 through ONDCP. Since then, participating agencies from the 68 HIDTA counties in Kentucky, Tennessee and West Virginia have worked together to coordinate drug suppression activities. Kentucky has 27 of the 68 HIDTA counties.

### •**Multi-Jurisdictional Drug Task Forces**

The Office of Drug Control Policy oversees and, in part, funds the network of 12 drug task force program across the Commonwealth. Drug Task Forces currently cover 61 counties and serves 2.7 million citizens.

### •**Kentucky State Police Methamphetamine Response Program**

KSP continues to be the lead law enforcement agency in the Commonwealth instrumental in the dismantling of clandestine methamphetamine laboratories. KSP has also provided funding, training, equipment, supplies and overtime to certified clan lab response personnel on state, county and local levels.

### •**Governor's Marijuana Strike Task Force (Kentucky State Police Marijuana Suppression Program)**

Kentucky is one of the top source states for the cultivation of very high quality domestic marijuana. This marijuana is a contributory factor for its desirability as an export product. In attacking a drug problem that affects an entire region of the nation, Kentucky's Marijuana Suppression Program has become an integral part of the National Drug Strategy and as such, has continued to receive nationwide acclaim.

●**Kentucky State Police Rural Drug Suppression Program**

The Rural Drug Suppression Program of the Kentucky State Police is comprised of at least one detective from each of the 16 State Police posts from around the state who conduct street level narcotic enforcement within the post area. In addition, detectives from Drug Enforcement Special Investigation East and West Sections are also assigned to the program as needed. KSP detectives work cooperative narcotic investigations with most local agencies within their post areas as well as federal law enforcement agencies who may adopt state cases for federal prosecution.

●**Alcoholic Beverage Control**

ABC is charged to protect the public welfare and interest by regulating the alcohol beverage industry. The enforcement, education and legal divisions of ABC oversee: licensing, provide training to people employed in the alcoholic beverage industry and enforce the laws and regulations of the Commonwealth pertaining to alcohol and tobacco violations. The enforcement and education divisions have also partnered in a new awareness program to prevent access and use of alcohol and tobacco products by minors.

●**Kentucky Attorney General Jack Conway**

Working closely with federal, state and local law enforcement officers, the Drug Investigations Branch is tasked with helping combat illegal drug abuse in Kentucky communities. The primary focus for the Drug Investigations Branch include:

- **diversion of prescription drugs** — illegal distribution, abuse, or unintended use of prescription drugs
- **"doctor shopping"** — individuals receiving prescriptions for the same drug from more than one doctor during the same time period or presenting false symptoms to multiple doctors in order to receive prescription medications
- **over-prescribing** — physicians who routinely prescribe more of a drug than is required by the diagnosis; this usually indicates that a doctor or pharmacist is writing prescriptions for personal gain or non-medical purposes
- **theft of prescription drugs**
- **illegal sale of prescription pain pills**

## Law Enforcement – MethCheck

---

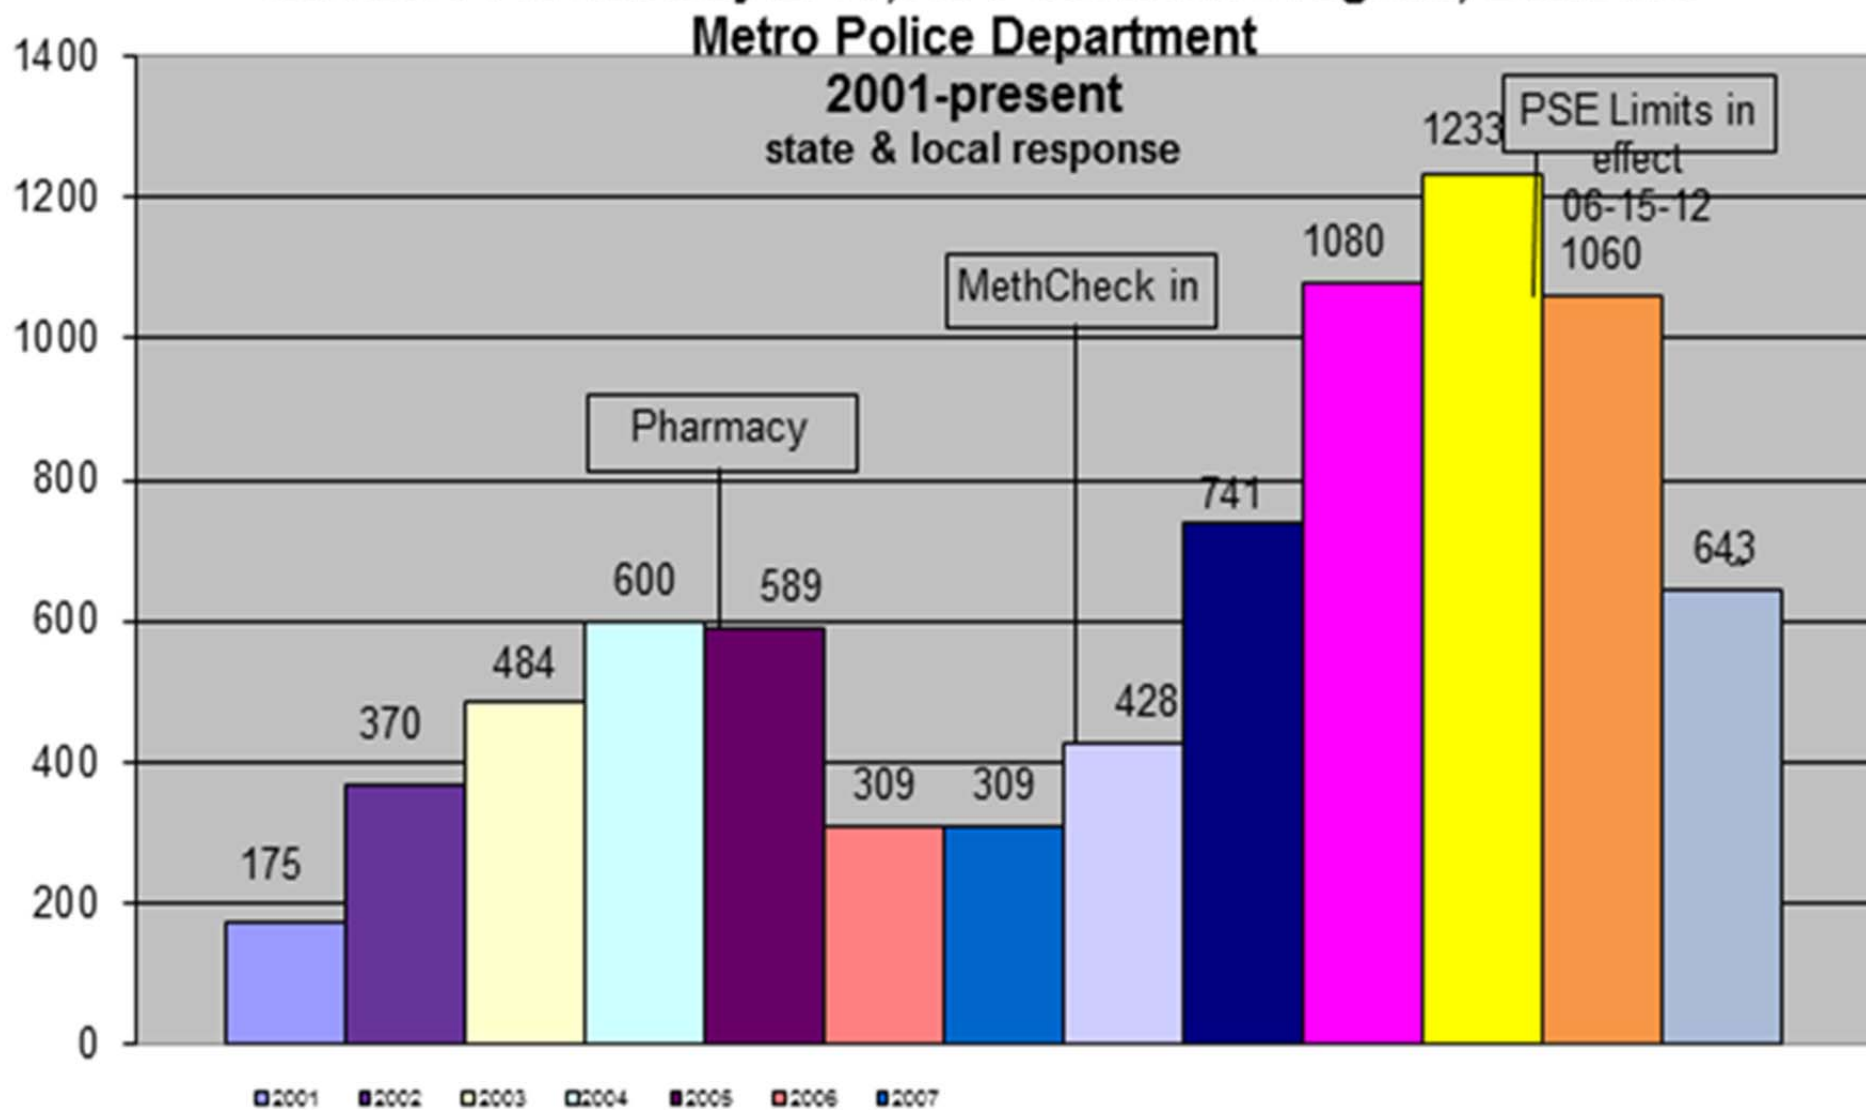

On July 10, 2007 the Kentucky Department of Corrections expanded a contract they held with APPRISS, a Louisville based company to provide the statewide VINE, JusticeXchange system. The contract included a pilot program to electronically monitor the sales of pseudoephedrine (PSE) in pharmacies in Laurel County, Kentucky. After two years of study, a revision of the original contract was approved by Finance and this program went into effect statewide on June 1, 2008. This project is a partnership between the Office of Inspector General Professional Standards Branch and the Cabinet for Health and Family Services and the Kentucky Office of Drug Control Policy. Funding for the first year of this project was provided by the KASPER program.

Kentucky became the second state to implement a real-time statewide electronic monitoring system capable of blocking the sale of pseudoephedrine products to individuals in violation of purchasing more than 9 grams in 30 days. It also provides 24/7 access to law enforcement officers conducting investigations on individuals suspected of violations of PSE restrictions. The Office of Drug Control Policy is required to respond to calls from pharmacies and customers during regular business hours. In the first 7 months of operation the system blocked over 10,000 attempts to violate PSE restrictions resulting in over 30,000 grams of PSE kept out of the hands of potential meth cooks.

In 2013, The Office of Drug Control Policy assisted 137 pharmacies and over 1,300 customers.

## Methamphetamine Lab Response for Kentucky

\*Numbers Provided by EPIC, ACS Container Program, Louisville

\* Preliminary

## Funding

---

The Office of Drug Control Policy was awarded funding for specific programs by the General Assembly for the 2013 biennium. Allocations included:

The Office of Drug Control Policy oversees the KY-ASAP funds allocated from the Phase I Tobacco Master Settlement Funds. In SFY 2013, the ODCP distributed \$1,600,500.00 to the KY-ASAP local boards in 116 of Kentucky's counties (including \$30,000 to 3 newly developing local boards).

The ODCP was also the recipient of a grant from the National Governor's Association.

## Collaborative Partnerships

---

The Office of Drug Control Policy has established significant working relationships with many governmental and private agencies across the Commonwealth and nationally. The strength of success is found in the quality of the working relationships. Listed below is a sampling of some of the agencies that have partnered with the ODCP on initiatives:

- The Commonwealth Alliance for Substance Abuse Prevention
- Appalachian Regional Commission
- Kentucky Coalition of Nurse Practitioners & Nurse Midwives
- University of Kentucky
- Community Anti-Drug Coalitions of America (CADCA)
- Big Brothers / Big Sisters Youth of the Year
- Department of Education
- Department for Medicaid Services
- Department for Public Health
- Department for Behavioral Health, Development and Intellectual Disabilities
- Eastern Kentucky University
- Environmental and Public Protection Cabinet
- Governor's Task Force on Campus Safety
- Kentucky All Scheduled Prescription Electronic Reporting (KASPER)
- Kentucky Administrative Office of the Courts – Drug Courts
- Kentucky Alcoholic Beverage Control

# Kentucky Office of the Attorney General

---

Kentucky's drug treatment programs will get a \$32 million infusion from settlements with two pharmaceutical companies, Merck Sharp & Dohme Corporation and GlaxoSmithKline.

Attorney General Conway filed suit against Merck for heavily marketing and promoting the drug Vioxx while failing to disclose to doctors and patients that it significantly raised the risk of heart attack. That case was settled for \$25 million. Attorney General Conway also sued GlaxoSmithKline for failing to disclose that patients taking its diabetes drug, Avandia, were at a higher risk for a cardiovascular problem. Conway settled that case for \$15 million.

The settlements will provide:

- Almost \$19 million to start a grant program that will fund juvenile substance abuse treatment programs by expanding treatment beds at existing facilities and creating new juvenile treatment programs.
- \$2.52 million in scholarships to help people not involved in the corrections system get treatment at Recovery Kentucky Centers. In all, 840 scholarships will be awarded over two years — 30 a year for each of the 14 Recovery Kentucky Centers currently operating.
- \$560,000 to help create 14 drug-free homes for people completing and transitioning out of residential substance abuse treatment programs. Residents at these homes must work and stay drug-free.
- \$500,000 to complete the construction of the state's 17th Recovery Kentucky Center, which is built upon a model in which addicts in different stages of recovery work together to get and stay sober. The new center will be located in Ashland.

Also over the next two years, the settlement will also provide:

- \$6 million to administer and upgrade Kentucky's electronic prescription drug monitoring program, known as KASPER.
- \$1 million to support substance abuse treatment for pregnant women by Chrysalis House in Lexington and Independence House in Corbin;
- \$1.5 million for the University of Kentucky to develop "best practices" for juvenile substance abuse treatment providers;
- \$1 million to develop a school-based substance abuse screening tool with the Kentucky Department of Education to help children at risk of abuse before they enter judicial or social services systems;

- \$250,000 to create a database to evaluate outcomes of juvenile treatment.
- Governor Beshear issued an executive order creating the Substance Abuse Treatment Advisory Committee to oversee settlement funding.

Attorney General Conway will chair the group, which also includes First Lady Jane Beshear, Cabinet for Health and Family Services Secretary Audrey Tayse Haynes, Justice and Public Safety Secretary J. Michael Brown, Kentucky Office of Drug Control Policy Director Van Ingram, and others.

[The Keep Kentucky Kids Safe Program](#) warns Kentucky kids about the dangers of abusing prescription drugs. In 2010, Attorney General Jack Conway joined with the Kentucky Office of Drug Control Policy, the Kentucky Pharmacists Association, the National Association of Drug Diversion Investigators, Operation UNITE and Dr. Karen Shay and Lynn Kissick, two mothers from Morehead, Ky. who lost daughters to prescription drug overdoses, to launch the Keep Kentucky Kids Safe program. Attorney General Conway and his Keep Kentucky Kids Safe partners travel to middle and high schools across the state to warn kids about the devastating consequences of prescription pill abuse. They are also urging parents to lock-up and monitor all prescriptions in the home.

Students hear from those on the frontlines in the battle against this epidemic, including Attorney General Conway, state officials, law enforcement, prosecutors, pharmacists and parents who have lost children to this scourge.

[Prescription Drug Abuse Prevention PSA Contest Attorney General Jack Conway](#) and his Keep Kentucky Kids Safe partners announced the start of their annual prescription drug abuse prevention public service announcement (PSA) contest for Kentucky's middle and high school students. The competition is part of General Conway's statewide public awareness and education initiative on the dangers of prescription pill addiction.

Attorney General Conway's video PSA competition is held in partnership with the Kentucky Office of Drug Control Policy, the Kentucky Pharmacists Association, National Association of Drug Diversion Investigators (NADDI), Operation UNITE and concerned parents, Dr. Karen Shay and Lynn Kissick.

2nd place:

(left to right) David Wann, Alex Aizpurua, Kaitlyn English, Kayla Little, and Bradley Stokes from Calloway County High School

# Prevention – KY Agency for Substance Abuse Policy

KY-ASAP has continued to evolve since its placement into the Office of Drug Control Policy in 2004. KY-ASAP continues to embrace and incorporate the philosophy of ODCP to involve the three-pronged approach of prevention, treatment and law enforcement. The Kentucky Agency for Substance Abuse Policy is unique in that local boards determine their own needs for their service area. Through a strategic plan and needs assessment, the local boards identify the issues they need to direct their dollars toward concerning tobacco, alcohol, and other drugs as related to abuse.

Local communities continue to be required to complete a community needs and resource assessment as well as develop a strategic plan and assist in coordinating the local response to alcohol, tobacco, and other drugs before they receive KY-ASAP local board designation. ODCP has applied limited resources to support of the local boards and currently has less than two full-time positions dedicated to local boards<sup>2</sup>. Fortunately, Regional Prevention Centers now provide technical assistance both to newly forming as well as existing local KY-ASAP boards. Furthermore, newly designated local boards now receive only \$20,000 upon completion of their needs & resource assessment and strategic planning documents.

KY-ASAP Local Boards now exist in 116 of Kentucky’s 120 counties and is currently being used in many of these communities as the primary component of a comprehensive drug education/prevention, treatment, and law enforcement programs. Within that three pronged approach, there are several intervention programs that have been proven to be effective and are available to schools, families and communities.

Local KY-ASAP boards are effective in their individual communities because these boards are comprised of the key stakeholders in the communities. Through these stakeholders a unique and varied perspective can be brought to the discussion table thus allowing a holistic approach to a local board’s ability to reach its entire community demographic. These stakeholders include individuals from the following sectors:

- |                            |                          |                 |
|----------------------------|--------------------------|-----------------|
| School Superintendent      | Faith Based Community    | Judicial System |
| Law Enforcement            | Media                    | Health Care     |
| University/College         | Mental Health Center     | Judge Executive |
| Health Department          | Family Resource Center   | Business        |
| Groups in ATOD Prevention  | Groups in ATOD Treatment | DCBS            |
| Leaders in ATOD Prevention |                          |                 |

Additionally, local boards may choose to add other community members to its membership roster. These additional members include parents, students, or other community members.

---

<sup>2</sup>staffing levels at ODCP and KY-ASAP decreased from as high as 14 to 4 today

The local KY-ASAP boards, through its community partners, engage in a variety of policy and programming initiatives; examples of these include:

- |                                      |                                  |
|--------------------------------------|----------------------------------|
| 100% Tobacco Free Policy             | Attitudes & Behavioral Surveys   |
| Beth's Blessings                     | Chad's Hope                      |
| Community Coalitions                 | ATOD Assemblies                  |

| Treatment Vouchers                   | Underage Drinking Campaigns      |
| UNITE Clubs                          | Youth Coalitions                 |
| Youth PSA Contests                   |                                  |

The Commonwealth is very fortunate to have local KY-ASAP boards that are extremely dedicated and offer innovative and creative approaches to attacking the tobacco, alcohol and other drug challenges in their communities. These local boards have a unique ability to find community collaborations that allow them to blend and braid various funding sources to provide the best practical solutions to the challenges they face throughout their communities. Through these community collaborations, local KY-ASAP boards are able to combine KY-ASAP funding with other funding to accomplish more in all communities across the Commonwealth.

Local Boards continue to take advantage of the many collaborative opportunities and outreach responsibilities it has to share the mission regarding prevention, treatment and law enforcement. Boards are always looking for a "teachable moment" with communication and collaboration to be successful.

KY-ASAP will continue to work toward significant goals that will strengthen our position to fight drugs in our communities through innovative partnerships, technology, and leadership.

In conclusion, the KY Office Of Drug Control Policy/Kentucky Agency for Substance Abuse Policy cannot stress enough that the local boards are dedicated, effective, valuable, but most of all, successful. They are an excellent local community tool and much needed component in educating, preventing, treating and enforcing substance abuse as part of a comprehensive prevention program.

Local boards are currently and have been involved in the following activities:

- Pain Clinic Ordinances
- Synthetic Drug Ordinances
- Supporting Tobacco Cessation programs
- Contracting with local school districts to provide evidence-based prevention programs in schools
- Hosting regional youth summits which focused on tobacco and underage drinking issues
- Investing in Drug Courts for adults and juveniles
- Providing Meth Awareness Trainings for community members
- Payment assistant for treatment services
- Support of School Resource Officers
- Providing financial support to law enforcement for prevention efforts
- Addressing substance abuse policies at all levels
- Media Ads with alcohol, tobacco and other substance facts (locally, statewide, & nationally)
- Student generated Public Service Announcements concerning Substance Abuse issues
- Supported community events such as Red Ribbon Week, Project Prom, Project Graduation, We Card, and Great American Ghost Out
- Collaborated with school districts and health departments to change smoking and drug policies at schools and provided financial support for programs such as Tobacco Education Groups/Tobacco Awareness Program (TEG/TAP), Teens Against Tobacco and Genesis Express
- Hosted Town Hall meetings to build awareness
- Preparing for community and school policy changes such as smoking ordinances, social host ordinances and random student drug testing
- Conducting adult and student surveys to assess the needs of their communities

Local KY-ASAP Boards utilize the KIP (Kentucky Incentives for Prevention) survey, among others, to collect their baseline data. The survey is conducted bi-annually in the fall in even-numbered years, with 6<sup>th</sup>, 8<sup>th</sup>, 10<sup>th</sup>, and 12<sup>th</sup> graders attending school in most Kentucky counties. To learn more about the KIP Survey and view the latest drug trends among youth in Kentucky visit the Reach of Louisville website at: <http://www.reachoflouisville.com>. In addition to the KIP survey, many local boards also continually conduct other adult and youth surveys in an effort to ascertain the most current and relevant community data.

Independent Accountant's Report

We have reviewed the expenditures of the Kentucky Health Care Improvement Fund from July 1, 2011 to June 30, 2012. The Cabinet for Health and Family Services and the Office of Drug Control Policy are responsible for the expenditures of the Kentucky Health Care Improvement Fund.

Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States. A review is substantially less in scope than an examination, the objective of which is the expression of an opinion on the expenditures of the Kentucky Health Care Improvement Fund. Accordingly, we do not express such an opinion.

Based on our review, nothing came to our attention that caused us to believe that the expenditures of the Kentucky Health Care Improvement Fund are not completely and accurately recorded, in all material respects, in the enhanced Management Administrative Reporting System (eMARS).

This report is intended solely for the information and use of the Cabinet for Health and Family Services, Office of Drug Control Policy, Kentucky Health Care Improvement Authority, Tobacco Settlement Agreement Fund Oversight Committee, and Legislative Research Commission and is not intended to be and should not be used by anyone other than these specified parties.

Sincerely,

Adam H. Edelen  
Auditor of Public Accounts

# Kentucky Permanent Prescription Drug Disposal Locations & Take Back Initiatives

---

The National Prescription Drug Take-Back Day took place on Saturday, October 26, 2013 and provided a safe, convenient, and responsible means of disposing of prescription drugs, while also educating the general public about the potential for abuse of medications.

Kentucky collected a total of 9,135 pounds of unused and/or unwanted prescription medications, and has collected 33,170 pounds at these events since October 2011.

## Permanent Prescription Drug Disposal Locations

172 locations in 110 counties  
(including 3 pending locations)

- 107 Counties with Operational Prescription Disposal Locations
- 1 Counties with both Operational & PENDING Prescription Disposal Locations
- 2 Counties with Pending Permanent Prescription Disposal Locations
- 10 Counties without Permanent Prescription Disposal Locations

updated: January 9, 2014

## KY-ASAP: Drug Free Communities Support Program

---

The Drug Free Communities program is directed by the White House Office of National Drug Control Policy, in partnership with the Substance Abuse and Mental Health Services Administration (SAMHSA). The DFC program provides grants of up to \$625,000 over five years to community coalitions that facilitate youth and adult participation at the community level in local youth drug prevention efforts, including prescription drug diversion and prevention initiatives, as well as underage drinking prevention programs. Coalitions are comprised of community leaders, parents, youth, teachers, religious and fraternal organizations, health care and business professionals, law enforcement, and the media. Data show that communities receiving DFC funding have seen significant reductions in past 30-day use of alcohol, tobacco, and marijuana among middle and high school students.

### **FY 2013 New Drug-Free Communities Grantees**

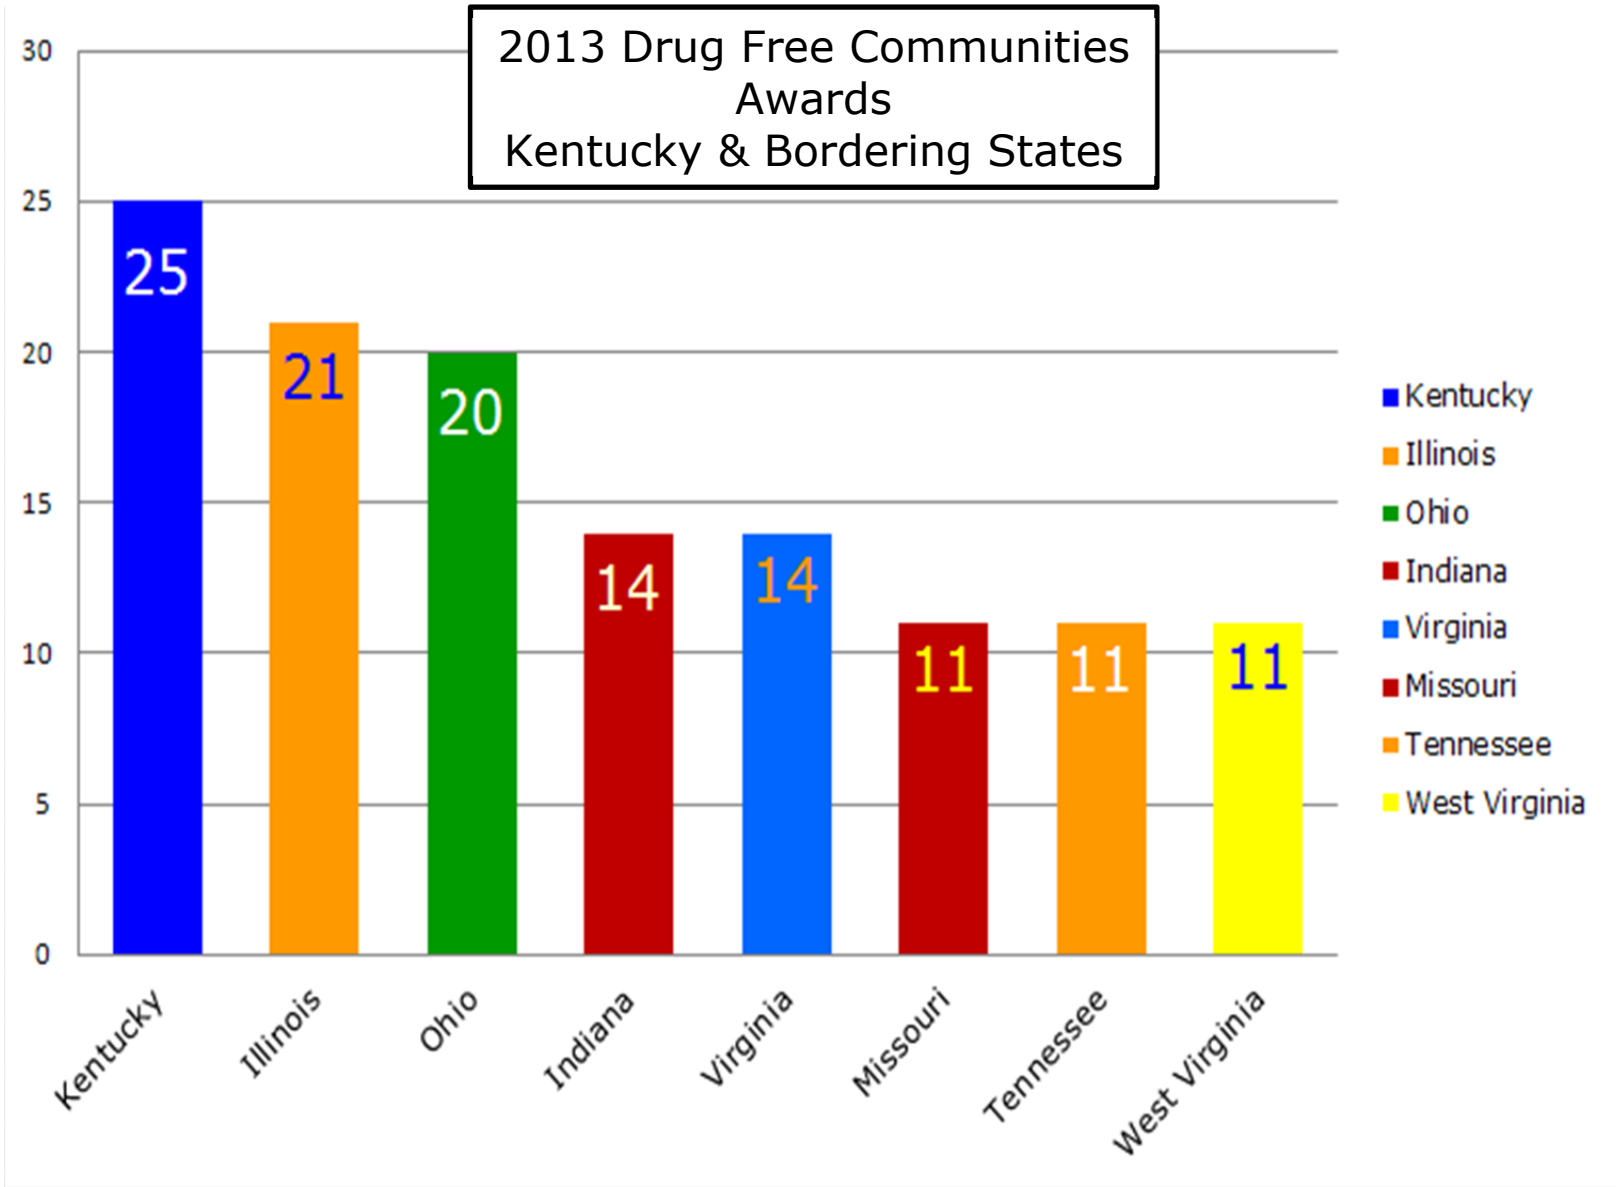

Carter County Drug-Free Coalition - Ashland  
Kenton County Alliance to Prevent Substance Abuse - Erlanger  
Graves County Agency for Substance Abuse Prevention - Mayfield  
Owsley County Drug Awareness - Booneville  
Monroe County KY-ASAP Board - Tompkinsville  
Barren/Hart/Metcalfe KY-ASAP - Glasgow

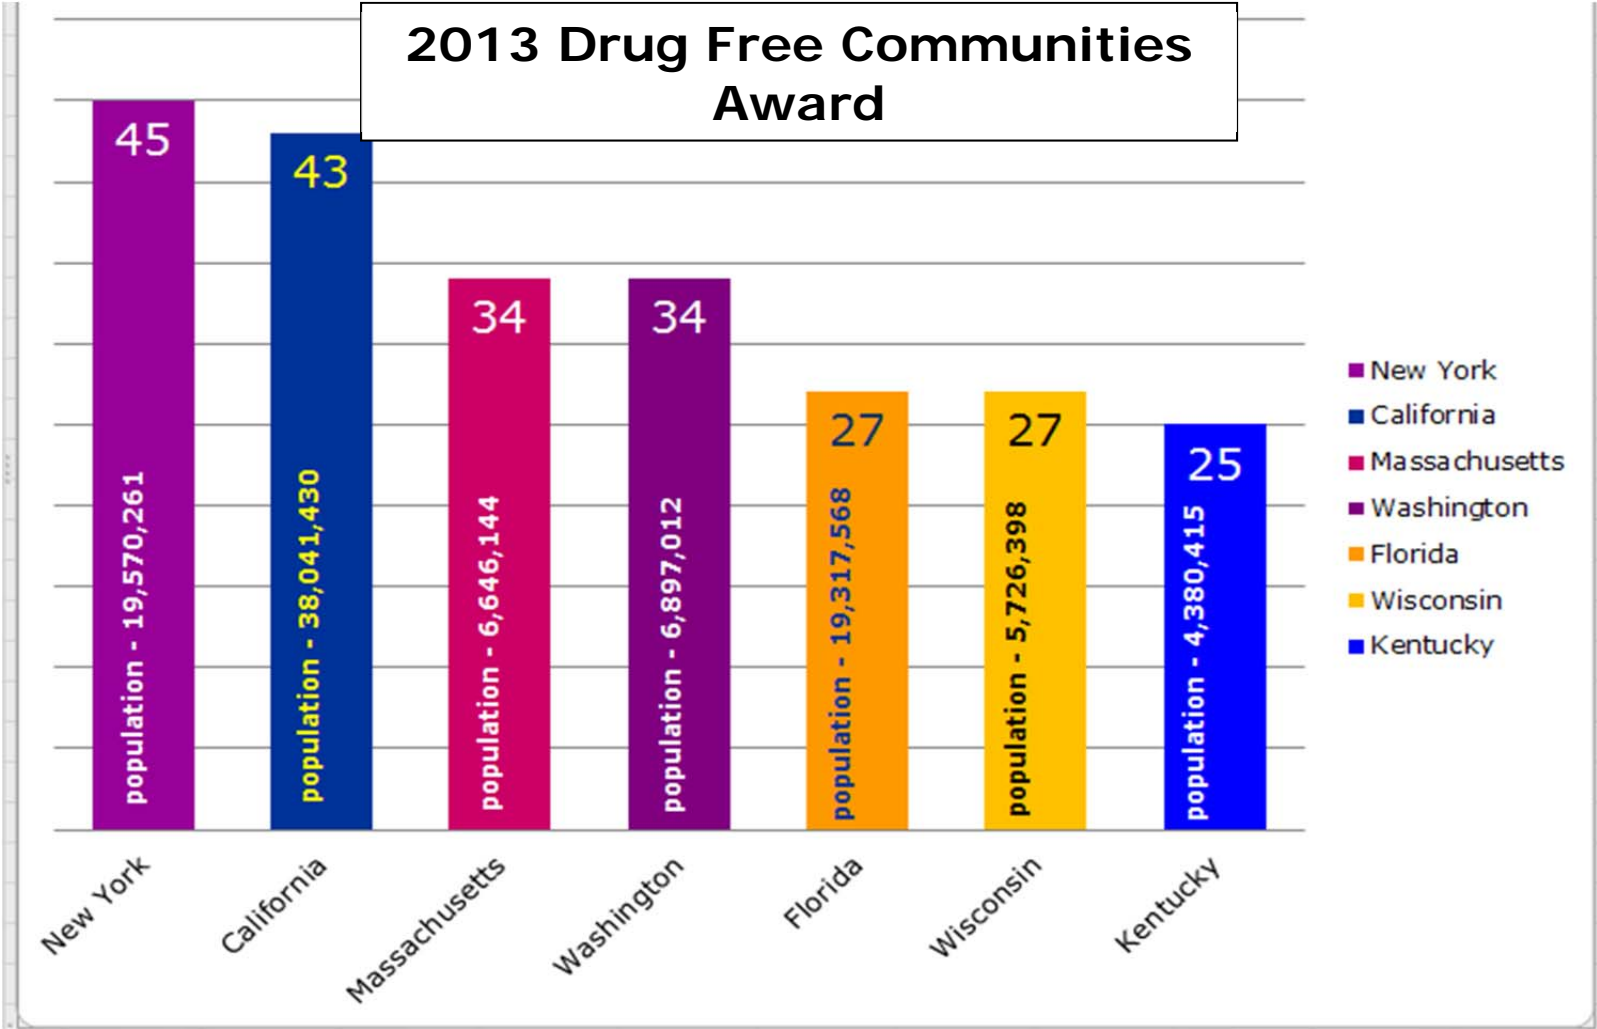

### **FY 2013 DFC Continuation Grantees**

Knott Drug Abuse Council - Hindman  
Champions for a Drug Free McCreary County - Whitley City  
Magoffin County KY-ASAP Board - Salyersville  
McLean County Community Coalition - Calhoun  
Russell County Partners in Prevention - Jamestown  
The Save Our Kids Coalition - Bowling Green  
Hancock Co Partners for a Healthy Community/Youth - Hawesville  
Breckinridge County Coalition for Change - Elizabethtown

7<sup>th</sup> Street Corridor PAL Coalition - Louisville  
Rowan County UNITE Coalition, Inc. - Morehead  
Scott Countians Against Drugs - Georgetown  
Mayors Alliance on Substance Abuse - Lexington  
Seven Counties Services - Louisville  
Trimble CARES - Bedford  
Champions for Drug Free Carroll County - Carrollton  
Green County KY-ASAP Board - Greensburg  
The Scottsville Allen County Faith Coalition - Scottsville  
Northern KY KY-ASAP Board - Covington  
Pulaski County KY-ASAP Board - Somerset

Kentucky & Bordering States

## 643 Drug-Free Communities Program Grantees for Fiscal Year 2013

## KY-ASAP: 4th Annual Youth Leadership Symposium

---

The 2014 Kentucky Youth Leadership Symposium will be held on June 23-24, 2014 at General Butler State Resort Park in Carrollton, Kentucky. Registration is open to youth in 8<sup>th</sup> – 12<sup>th</sup> grades for the 2014-2015 school years.

The symposium is designed to educate youth on how to be leaders in their schools and community with specific regards to good decision making and to provide program ideas and resources for prevention activities ~ including bullying prevention, teen driving safety, theft prevention, school safety, tobacco, alcohol & drug prevention, and other prevention “hot topic” issues.

**Youth Leadership Symposium**

The symposium will provide attendees an energetic & interactive learning experience featuring a keynote speaker & interactive & student led workshops!

**General Butler State Resort Park**  
June 23-24, 2014  
9:00 am – 3:30 pm

open to students in 8th – 12th grades (2014 – 2015 school year)

\$75 per person (minimum 4 youth + 1 adult)

**presented by:**

**KCSS** **KCPBS** **KY-ASAP**

Register at:

**save the date** **more info soon!**

## KY-ASAP: State Board Agency Report

KY-ASAP is required by KRS 15A.342 (formerly codified as KRS 12.332) (20) to report on "the proper organization of state government agencies that will provide the greatest coordination of services, report semi-annually to the Legislative Research Commission and the Governor on the proper organization structure, devising and implementing an accountability system to be designed to ensure efficiency and efficacy of service and grants, and on other matters as requested by the Legislative Research Commission and the Governor." The following is the semi-annual update of state government activities and other organizations that serve on the KY-ASAP state board.

### Administrative Office of the Courts (Laurie Dudgeon)

**Federal** - Since 2009, the Administrative Office of the Courts, Division of Drug Court has partnered with the University of Kentucky Department of Education Policy Studies and Evaluation and Morehead State University Department of Social Work to secure numerous federal grants with the Substance Abuse and Mental Health Service Administration (SAMHSA) and the Bureau of Justice Assistance (BJA).

In 2013, Kentucky received 1 SAMHSA grant and 1 joint SAMHSA/BJA grant, 2 BJA enhancement grants, 1 BJA implementation grant and 1 statewide BJA grant that will fund a statewide drug court conference for all drug court judges, staff and up to 4 additional team members. The enhancement grants not only allow for enhanced treatment, recovery support and wraparound services but will also allow the drug court programs receiving the funding to increase the number of participants served overall.

In 2013, Judge Kimberly Shumate and 9 other Hardin County team members were selected for and participated in the National Drug Court Institute's Veteran's Treatment Court Planning Initiative Training. One of the 2013 BJA grants mentioned above was received to implement a Veteran's Treatment Court in Hardin County. The will begin accepting participants in January, 2014.

The Kentucky Drug Court Executive Officer continued as secretary in the National Association of Drug Court Professionals (NADCP) National Board. The focus of the NADCP is to provide substance abuse education, share model programs, research and create partnerships across the country. The Division of Drug Court worked with the NADCP by participating in NADCP Congress meetings, by working with the NADCP National Board and by attending the NADCP conferences.

The Department of Family and Juvenile Services was awarded funding for Bullitt County Family Court through the Bureau of Justice Assistance to address substance abuse issues related to the removal of their children from their parents. The program received a no-cost extension that allowed program sustainability through September 2013. The funds are being utilized to ensure best practices are in place

when dealing with these difficult issues that are impacting stability and permanency for families. Additionally, the Department of Behavioral Health was awarded a SAMHSA grant for an enhanced "Families Moving Beyond Abuse" program that will operate for 2 year past the original award. During this initiative, the department received technical assistance from Children and Family Futures, in collaboration with the National Council for Juvenile and Family Court Judges. This lead to an additional request of technical assistance to look at the use of assessment and drug testing in courts practicing family law in Kentucky. Best practices identified in this partnership are being utilized in the development and implementation of a statewide drug testing pilot for parents who have had their children removed due to underlying substance abuse concerns.

The Department of Family and Juvenile Services was awarded a Justice and Mental Health Collaboration grant through the Bureau of Justice Assistance in Jefferson County. The collaborative grant provides services and support to juveniles with offenses related to substance abuse and/or mental health issues. The collaboration consists of the courts, Court Designated Workers, Department of Juvenile Justice, Seven Counties Comprehensive Care, and the Morton Center. A no-cost extension was awarded to sustain this program until March 2013.

BJA authorized funding through the Vera Institute of Justice (Vera) for both the Department of Corrections and the Administrative Office of the Courts. The collaboration between Vera, the Department of Corrections and the Administrative Office of the Courts, was to provide funding to both agencies for follow up training regarding House Bill 463. In 2013, approximately 100 staff with the AOC division of Pretrial Services and Drug Court attended a Motivational Interview Training April 16-18, 2013 in Cadiz, Kentucky funded by Vera.

**State - Office of Drug Control Policy (ODCP)** - ODCP administers funds to the AOC Division of Drug Court in coal producing counties. Adult Drug Courts in 35 counties [Bell, Boyd, Breathitt, Clay, Daviess, Elliott, Floyd, Hancock, Harlan, Henderson, Hopkins, Jackson, Johnson, Knott, Knox, Laurel, Lawrence, Lee, Leslie, Letcher, Magoffin, Martin, Menifee, Morgan, Muhlenberg, Ohio, Owsley, Perry, Pike, Pulaski, Rockcastle, Union, Webster, Whitley and Wolfe] are operational through these funds. Since inception, these programs have graduated 1,942 participants, have collected \$2,651,167.21 in child support, restitution and court costs and as of December 31, 2013 had 641 active participants.

**State - KY-ASAP** - KY-ASAP continues to collaborate with AOC Drug Court programs throughout the state. Jurisdictions have often sought and received assistance through KY-ASAP for enhanced funding for the basic essentials of Drug Court, drug testing and treatment. KY-ASAP local boards also provide a variety of assistance to Drug Court programs, ranging from providing transportation for participants, to purchasing graduation items, assisting with resources, or assisting with education about alcohol and drugs. Drug Court staff have provided trainings and/or information regarding substance abuse to local KY-ASAP boards or other community groups.

**State - Community Corrections Grant** - The AOC Division of Drug Court received a Community Corrections grant for the continuation of the pilot SMART Probation Projects in 6 jurisdictions: Allen/Simpson; Jefferson; Shelby/Spencer/Anderson; Campbell; Pike; and Lincoln/Pulaski/Rockcastle. SMART (Supervision, Monitoring, Accountability, Responsibility, Treatment) was authorized by Kentucky House Bill 463, Section 103. SMART targets and appears to be effective for defendants who use or abuse substances, but whose substance use has not risen to the level of addiction, or defendants who have previously been unsuccessful on probation because of technical violations or a defiant disregard for the terms of probation. The probation strategy uses long term behavior modification concepts combined with supervision and immediate responses to negative behavior choices either by the probation officer or the judge.

**State - Operation UNITE** - The Division of Drug Court and Family and Juvenile Services Department continued to partner with Operation UNITE through the use of Operation UNITE's treatment vouchers, shared trainings, and collaborative projects. In 2013, The Drug Court Executive Officer presented on a panel at UNITE's second National Rx Drug Abuse Summit. Local UNITE community coalitions assist individual Drug Court programs with a variety of needs ranging from assistance in arranging transportation to educational opportunities.

**State - Stand in the Gap** - Bell County Drug Court has been involved with Stand in the Gap functions. Stand in the Gap is an organization looking to free communities from the hold drug addiction has cast on many families. More than 15,000 people from Virginia, Kentucky and Tennessee marched to Cumberland Gap in 2012 as part of the Stand in the Gap coalition.

**State - Shop and Share** - Shop and Share is a joint initiative of the First Lady's Office, the Kentucky Domestic Violence Association (KDVA), Kroger, Food City, the Kentucky Commission on Women, the General Federation of Women's Clubs, the Girl Scouts of Kentuckiana, the Girls Scouts of Wilderness Road Council, and the Kentucky Drug Court to collect needed goods and funds for the 17 domestic violence shelters across the Commonwealth. The AOC Division of Drug Court has been involved with Shop and Share for five years. This collaboration provides an opportunity for Drug Court participants to give back to the local communities. Drug Court and the Center for Women and Families (Domestic Violence Shelter) have an on-going working relationship to assist Drug Court participants with providing domestic violence education.

**State - Recovery Coordinator Training** - December 2013 the AOC held a three day Recovery Coordinator training in Frankfort, Kentucky. The Chrysalis House, Healing Place of Louisville, Kentucky Physicians Health Foundation and The Ridge Behavioral Health System of Lexington partnered with the AOC for the training. The following subjects were presented: the disease model and brain chemistry, co-occurring mental health disorders, self-care and trauma informed care.

**Local Government and/or Entities - Fiscal Courts** - Several fiscal courts throughout the state continue to provide money and/or space for Kentucky Drug

Court programs in their jurisdiction. This funding pays for staff, additional treatment and additional drug testing.

**Local Government and/or Entities - Steering Committees** - Drug Court programs have influential leaders/citizens in the community that comprise a steering committee. A steering committee may raise funds to assist and help with buying food for drug court events, graduations, or special holiday dinners. Some steering committees have been known to assist participants with in-patient treatment beds and other financial burdens.

**Local Government and/or Entities - SCAD (Scott Countains Against Drugs)** - The SCAD provided funding for the Scott County Drug Court staff to attend the Kentucky School of Alcohol and Other Drug Studies for the past three years.

**Local Government and/or Entities - Louisville Urban League** - The Louisville Urban League has provided work force development through job readiness and job placement programs. They have also provided housing and educational counseling to the Jefferson County Drug Court participants.

**Local Government and/or Entities - Educational Opportunities** - The Division of Drug Court conducted numerous process meetings across the state during 2013. The purpose of the meetings was: to train new drug court judges and team members and for the teams to perform self-evaluation of their programs and processes. The training and self-evaluation ensures that each team continues to utilize the National Association of Drug Court Professionals 10 Key Components for Drug Courts and the Kentucky Supreme Court's Drug Court Administrative Procedures. Along with drug court staff, judges and team members, representatives from several community service organizations and other agencies partnering with drug courts attended the meetings. Representatives included, but were not limited to, local community mental health agencies, local and state law enforcement agencies, jailers, prosecutors and defense bar, Department of Social Services, Office of Vocational Rehabilitation, probation officers, past drug court graduates, members of the faith based community, local pharmacists and physicians, Circuit Court Clerks and others interested in and involved with the drug courts.

**Local Government and/or Entities - Pretrial Services** - The AOC Division of Pretrial Services uses various methods to identify substance abuse issues of those supervised through monitored conditional release and diversion programs. Pretrial Services use a combination of standardized screening instruments, past criminal history and referrals to community providers to determine treatment needs of each client.

Based on an assessment and specific criteria, a recommendation is made to the court for consideration of release from jail with the condition of obtaining a substance abuse evaluation by a licensed treatment facility or obtaining treatment. In some cases, drug testing along with treatment is recommended. If approved by the court, the Pretrial Officer meets with the client and provides him or

her with a list of licensed treatment providers in the region. Pretrial Services then monitors compliance with the treatment conditions and/or drug testing until final disposition of the client's court case.

Pretrial officers also identify defendants who have been arrested and are veterans and/or who had been in combat. In 2012, RCr 4.08 was amended to inform defendants with recent or past military service that, with permission, contact information will be provided to Veteran's Assistance. For those who do not wish Pretrial Services to share contact information with VA, Pretrial Services Officers ensure that services such as substance abuse treatment, mental health treatment, housing, education and counseling are offered to veterans as standard practice.

In calendar year 2012, 52% of all defendants interviewed were identified as having potential issues with substance abuse and in calendar year 2013 44% of all defendants interviewed were identified as having potential issues.

### [Alcoholic Beverage Control \(Fred Higdon\)](#)

The Kentucky Department of Alcoholic Beverage Control (ABC) licenses and regulates the sale of alcoholic beverages in Kentucky. Along with that responsibility, ABC actively combats youth access to alcohol and empowers licensees to serve alcohol responsibly through effective programs and policies. ABC ensures compliance and understanding of ABC laws through a two-pronged approach of education and enforcement.

**Education** - The Education Branch within the Department of Alcoholic Beverage Control provides the Server Training in Alcohol Regulations (S.T.A.R.) training seminars throughout the state. This program is in place to train and educate the people who work with, sell and serve alcohol in Kentucky. The main goals of S.T.A.R. are to reduce alcohol sales to minors, reduce sales to intoxicated persons, to provide information on Kentucky Revised Statutes relating to alcohol sales and to inform servers of legal liabilities when serving or selling alcoholic beverages. Participation in the program results in a better trained and informed workforce for our retailers' establishments. Upon completion of the four hour course and passing the exam, participants are awarded a certification from the Commonwealth of Kentucky, which is valid for three years. The Department trains approximately 4,000 individuals annually. Classes are rotated to various statewide locations to provide accessibility to all retailers and their employees as well as city and county ABC Administrators, prevention groups and law enforcement officers. ABC currently has 18 contract trainers strategically located throughout the Commonwealth that provide the instruction during the S.T.A.R. classes. The Education Branch schedules all S.T.A.R. classes as well as schedules all on-site requests and special event trainings. They also promote the S.T.A.R. program.

During 2013, 302 classes were held with 5,396 individuals being trained. Since the beginning of S.T.A.R., there have been approximately 38,000 people certified through the program. The agency deems this a contributing factor to the significant decrease in sales to minors as measured by our Department's Operation

Zero Tolerance Program. Sales to minors decreased from 24% in 2001 to 7% in 2013. This represents a reduction of 17% in the past twelve years.

Emphasis on server training continues to increase with twelve (12) new communities in Kentucky mandating server training from 2012-2013, bringing the total number to 65 cities and/or counties. Many have requested ABC's assistance and indications are that numerous other communities will follow in the future as more areas change from dry to wet via local option elections.

In addition to the S.T.A.R. training program, the Education Branch conducted special event training to organizations that sell and serve alcohol at temporary locations during 2013, such as the Louisville Archdioceses, Frankfort Jaycees and other civic and private organizations. Education Branch personnel also developed and delivered presentations statewide to various civic organizations as well as high schools, universities and the general public. These groups included: Lexington Mayor's Alliance, Adair County High School, Taylor County High School, Campbellsville Independent High School, Green County High School, Washington County High School, and numerous other organizations upon request. The Education Branch Manager served as the designee for the Department with The Lexington Mayor's Alliance, Scott Countians Against Drugs (S.C.A.D.), and the Kentucky Prevention Network. Further, upon request, staff meets with various organizations, including industry and community awareness groups, city councils, and prevention entities.

**Enforcement** - The Enforcement Division of the Kentucky Department of Alcoholic Beverage Control also considers preventing youth access to alcohol a top priority. ABC Investigators are vested with full police powers to enforce all state laws. Investigators are strategically located throughout the Commonwealth to maximize their special emphasis on the enforcement of the state's alcohol laws on a daily basis. Enforcement conducts and engages in effective alcohol compliance enforcement strategies. One such program is Operation Zero Tolerance (OZT). OZT checks retailer compliance by enlisting 18-20 year old investigative aides who attempt to purchase alcoholic beverages at licensed premises throughout the state. OZT compliance checks are designed to ensure that licensees are not selling alcoholic beverages to minors. If a sale is made to an investigative aide during an OZT compliance check, the employee who makes the sale is cited to criminal court and an administrative citation is issued against the licensed establishment. OZT compliance checks are randomly conducted at licensed premises throughout the year. The goal of the division is to raise retailer awareness of checking IDs at the point of sale and preventing youth access to alcoholic beverages.

During the 2013 calendar year, the Division conducted 1,897 OZT checks resulting in 134 alcohol purchases and a compliance rate of 93%.

Another enforcement strategy utilized is Target Enforcement Details (TED), in which ABC works with local and state law enforcement agencies during special events where alcoholic beverages are sold in conjunction with a high concentration of minors. The Enforcement Division brings in ABC investigators from all over the

state to work these events. Investigators walk through and observe the crowd for any alcohol violations. ABC personnel frequently receives requests to assist local law enforcement with enforcing alcoholic beverage laws so that local law enforcement can focus on traffic control, securing the perimeter, and other general law enforcement duties. As the only law enforcement agency in the Commonwealth that specifically enforces alcoholic beverage laws, the Enforcement Division is duty-bound to commit personnel and resources to these special events. It is an important part of ABC's mission in combating underage drinking.

During the 2013 calendar year, the Division conducted 40 TED events resulting in 556 citations.

In addition to OZT and TEDs, the Enforcement Division conducts Cops-In-Shops details. The Cops-In-Shops program is targeted at deterring minors from obtaining alcoholic beverages at the point of sale. During Cops-In-Shops details, Investigators work alongside local law enforcement personnel and pose as employees or customers at a specific retail location. When an underage person purchases or attempts to purchase alcoholic beverages, they are cited to district court. During 2013, the division reported working at 30 retail locations with a total of 186 citations issued.

A fourth prevention initiative is conducted through tobacco sales compliance checks at Kentucky retail establishments. As with OZT, Investigators employ 15-17 year old aides who attempt to purchase tobacco products at retail outlets. These checks are designed to ensure retailers are not selling tobacco products to minors.

During the 2013 calendar year, the division conducted 2,424 tobacco checks resulting in 82 underage tobacco purchases for a 97% compliance rate.

Another part of the tobacco prevention initiative is the Federal Synar Survey. This survey assesses retailer compliance regarding the sale of tobacco products. The goal of the survey is to maintain a high rate of compliance through education and prevention efforts and the data collected during the survey shows the success of those ongoing efforts. The Synar survey is part of the Substance Abuse Prevention and Treatment Block Grant. If compliance rate falls below 80%, the funds can be decreased by up to 40%. The grant gives support to public health initiatives, prevention measures and educational programs for substance abuse. The Synar compliance checks are conducted during the summer when youth are not in school. Investigators are assigned to perform inspections at randomly selected retail outlets through the research firm, REACH of Louisville, Inc.

During the inspection, two Investigators enter a retail outlet. After safety is determined by the Investigators, the teen investigative aide enters and attempts to purchase tobacco products. If the employee and/or retailer sell tobacco products to the investigative aide, an ABC Investigator will issue an administrative citation to the suspected violator for the violation of KRS 438.310. The Investigator will seize the tobacco product from the investigative aide and process it as evidence until a hearing is held and/or the case is resolved. If no sale is made to the investigative

aide, the investigative aide and the Investigators leave and proceed to the next assigned inspection. The management of each retail outlet is later notified of the results (compliance/non-compliance) of the inspection.

In 2013, Investigators of the Division conducted 217 (Synar) tobacco checks resulting in 11 violations and a compliance rate of 95%.

In 2011, ABC was awarded a contract by the Food and Drug Administration (FDA) to enforce provisions of the Family Smoking Prevention and Tobacco Control Act of 2009. Under the law, tobacco retailers will be inspected to ensure they are complying with new marketing and sales standards.

The following link may be used to check on FDA tobacco inspections. <http://www.fda.gov/TobaccoProducts/GuidanceComplianceRegulatoryInformation/ucm232109.htm>.

### **[American Cancer Society – Kentucky Chapter \(James Sharp\)](#)**

The American Cancer Society is a voluntary health organization dedicated to eliminating cancer death and suffering through research, education, advocacy and patient support services. Lung cancer is the leading cause of cancer-related death in both men and women in Kentucky with nearly 3,500 people dying this year alone. With smoking linked directly to lung cancer, the American Cancer Society works to impact this most preventable cause of death in our society.

In association with key partners, the American Cancer Society works to change state and federal policies to decrease the numbers of tobacco related deaths. Some of the most effective tactics advocated for include an increase in state tobacco taxes to reduce youth smoking and smoke-free local laws to protect all workers from the dangers of secondhand smoke.

The American Cancer Society also works to enact comprehensive tobacco control policies and cessation programs including education efforts to help people kick the tobacco habit and support services, like the Quit Line. For those diagnosed with cancer after smoking, the organization offers an array of patient support services so cancer patients can cope with the disease and its treatment.

### **[American Heart Association \(David Sloane\)](#)**

The American Heart Association is a voluntary health organization dedicated to reducing death and disability due to heart disease and stroke. Because tobacco use is one of the major risk factors for heart disease and stroke, preventing and reducing tobacco use among children and adults is one of the association's top priorities. Our efforts in this area primarily take the form of advocacy initiatives to

promote policy and environmental changes that will have a positive impact on tobacco use and initiation.

The American Heart Association works with the American Lung Association, the American Cancer Society, the Campaign for Tobacco Free Kids and other key partners on all tobacco related advocacy activities. Policy initiatives are based on best practices guidelines for comprehensive tobacco prevention and cessation programs.

Our current focus is on advocating for passage of a statewide comprehensive smoke-free law that would prohibit smoking indoors in public places and workplaces, while continuing support for local smoke-free campaigns. 39 Kentucky communities have enacted smoke-free ordinances or regulations at the local level, 22 of which are comprehensive. As a result approximately 34% of Kentuckians live in an area covered by a strong local law. The American Heart Association believes that all Kentuckians have the right to breathe clean air and we hope that Kentucky will become the 25<sup>th</sup> state to pass a strong law.

Public awareness and education regarding the health hazards of tobacco use is integrated into the association's program activities as well. This includes Get With the Guidelines, the organization's premier hospital based quality improvement program and Go Red for Women, our national movement that empowers women to prevent heart disease and lead healthy lives.

### [American Lung Association \(Ellen Kershaw\)](#)

The American Lung Association (ALA) is dedicated to preventing lung disease and promoting lung health. Founded in 1904 to fight Tuberculosis, the American Lung Association is America's oldest nonprofit voluntary health organization. The American Lung Association carries out its mission using three basic strategies: education, advocacy and research. Considering that tobacco use is the most preventable cause of lung disease in our culture, the American Lung Association works closely with key partners to change local, state and federal policies to decrease the numbers of tobacco related deaths.

The American Lung Association's policy goals in this area are based on best practice guidelines for comprehensive tobacco prevention and cessation programs and primarily take the form of advocacy and educational tobacco cessation programs.

The American Lung Association continues to support policy changes that can result in lowering tobacco utilization and preventing people, including youth, from starting smoking. The American Lung Association supported increasing the tobacco tax in Kentucky in past years and notes that Kentucky is still way below the national average cigarette tax rate. Raising cigarette taxes results in an increased demand for cessation services and a decrease in the overall smoking rate in Kentucky.

ALA continues to support smoke-free laws in local communities throughout Kentucky. Kentucky now has 23 communities that have passed comprehensive smoke-free laws and 16 others with less strong smoke-free laws. We are a part of the Smoke-free Kentucky Coalition which is working for a statewide smoke-free law.

The American Lung Association also offers: public education about the consequences of tobacco use; a free call center to answer questions regarding lung health and provide counseling on quitting smoking; assistance to a network of support groups around the state for people and their families who are dealing with chronic lung disease. Finally, the American Lung Association offers a variety of school based programs for youth and continuing education opportunities for health care professionals to ensure the most up to date information is available on lung health issues.

**Cabinet for Health and Family Services (Secretary Audrey Haynes),  
Department for Behavioral Health, Developmental and Intellectual  
Disabilities Division of Behavioral Health (Connie Smith)**

**The Division of Behavioral Health Substance Abuse Prevention Branch -  
Substance Abuse Prevention and Treatment Block Grant Prevention Set-Aside:**

No less than 20% set aside for primary prevention programs for individuals who do not require treatment for substance abuse. The majority of this prevention set aside is allocated to the state's network of Regional Prevention Centers (RPCs) housed within the Community Mental Health Centers (CMHCs) and Kentucky's network of Prevention Enhancement Sites. These prevention funds allow the RPCs to implement community-based strategies consistent with the Strategic Prevention Framework to reduce the consequences of substance use by youth and adults and to build community coalitions to support prevention efforts. The RPCs are excellent community consensus builders and many have been instrumental in assisting their communities in establishing tobacco and alcohol related ordinances.

**Accomplishments** - The Prevention Branch continues to pursue the four goals of SAMSHA's Strategic Initiative # 1 the four goals of the Strategic Initiative # 1 are:

1. With primary prevention as the focus, build emotional health, prevent or delay onset of, and mitigate symptoms and complications from substance abuse and mental illness.
2. Prevent or reduce consequences of underage drinking and adult problem drinking.
3. Prevent suicides and attempted suicides among populations at high risk, especially military families, LGBTQ youth, and American Indians and Alaska Natives.
4. Reduce prescription drug misuse and abuse.

Goal # 1 - The integration of mental health and substance abuse prevention continues to be a priority. To meet the challenges posed by Strategic Initiative goal one #1 The Division of Behavioral Health Prevention Branch has collaborated with the Mental Health Branch to make mental health first aide training available to RPC staff and other concerned service providers. Thus far over 60 Regional Prevention Center Staff and community affiliates of state agencies have been trained. One member of the Prevention Branch staff has received Master Trainer certification and is planning to provide more training to RPC staff in the future.

Goal#2 - The Prevention of underage drinking (UAD) has been a statewide prevention priority since being identified by the State Epidemiological Workgroup in 2010. As can be seen from the KIP 2012 Survey trend report modest decreases have been achieved in all grade levels surveyed. Some slight reductions have been achieved.

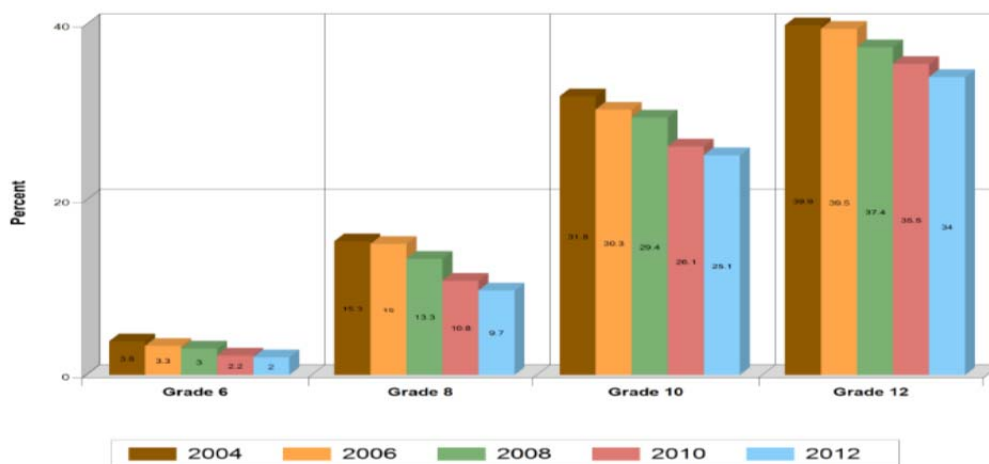

### 30 Day Alcohol Usage

Kentucky

Question 21c - On how many occasions (if any) have you had alcoholic beverages (beer, wine, or hard liquor) to drink--more than just a few sips in the past 30 days?

Percent that answered at least 1 occasion

Grade	2004	2006	2008	2010	2012
6	3.8%	3.3%	3%	2.2%	2%
8	15.3%	15%	13.3%	10.8%	9.7%
10	31.8%	30.3%	29.4%	26.1%	25.1%
12	39.9%	39.5%	37.4%	35.5%	34%

KIP SURVEY

8

Goal # 3 - The Division of Behavioral Health continues to pursue strategic initiatives relating to populations of high risk. The Substance Abuse Prevention Branch is collaborating with the Suicide Prevention Program and the Military Behavioral Health Coordinator to conduct statewide needs and resource assessment of active military and veteran's behavioral health needs. The goal of the project is to create a comprehensive map of resources and service providers to meet the needs of the military population.

In respect to the LGBTQ community, the Division of Behavioral health has continued to collect data for its need assessment and has added with the Office of

Health Equity as a member of its workgroup. The workgroup has drafted a position statement and is working with the Department of Behavioral Health Developmental and Intellectual Disabilities to have the position statement adopted.

Goal #4 - The chart below shows reductions in all grade levels surveyed for past 30 day illicit use of prescription drugs. The most dramatic decreases are those for 10th and 12 grade prescription drug use. 10th grade 30 day use declined from 6.2% in 2010 to 4.1% in 2012. Twelfth grade use decreased from 7.2% to 4.8% during the same period. These successes were highlighted in a Courier Journal article dated October 5th 2013. (Published statewide)

**The Strategic Prevention Framework Partnership for Success II Grant -** Kentucky is now in year two of its Partnership for Success II grant. All seven target regions have submitted their year two strategic plans. These plans have been approved and work has begun on their implementation.

Some PFS outcomes accomplished in year one includes:

- Creation of detailed regional epidemiological profiles for all 7 PFS grantees
- leveraging of resources from community partners to support 226 PFS prevention activities (training, media advertising, implementation of evidence-based curriculum, wide scale distribution of prevention materials, etc.)

- Installation of 19 permanent drop boxes in PFS Rx target regions.
- Statewide Rx conference specifically targeting law enforcement. Over 70 law enforcement officers from the 4 Rx target regions attended.
- An evaluation project to determine the effectiveness of Rx drop boxes
- Launching of the MEDS campaign in all 32 counties of the PFS Rx Target Regions (Monitor, Educate, Dispose, or Secure)
- Launching “I Won’t Be the One” campaign targeting social access of alcohol in all 41 counties of the PFS UAD Regions.
- Implementation of Evidence based school curriculum (Project Alert) in middle schools in 7 counties of one target region
- Implemented Senior Wellness curriculum with an Rx educational component in 5 counties.
- Implemented a variety of environmental strategies in the four UAD target regions such as:
  - o Social Host Ordinances
  - o High Visibility Enforcement of underage drinking
  - o Region wide alcohol compliance checks
  - o Providing passive alcohol sensors to law enforcement so that alcohol can be more easily detected when underage youth are pulled over for traffic violations.
  - o Region wide Social Norms campaigns that target underage drinking

**State Epidemiological Outcomes Workgroup Supplement Grant** - In September of 2013 the DBH Prevention Branch was awarded a three year, State Epidemiological Outcomes Workgroup Supplement Grant. The purpose of the grant is to enable states to better:

Address two of the nation’s top substance abuse prevention priorities: 1) underage drinking among persons aged 12 to 20; and 2) prescription drug misuse and abuse among persons aged 12 to 25. The purpose of these supplemental grants is to allow SPF-PFS II grantees to expand and enhance the activities of their current State Epidemiological Outcomes Workgroups (SEOWs). At a minimum, grantees must use these supplemental funds to work with their SEOWs to:

- develop a systematic, ongoing monitoring system to track progress in reducing underage drinking and prescription drug abuse in grantee communities of high need;
- detect trends and use such data to redirect resources, as necessary, toward successfully achieving the goals of the SPF-PFS program;

- support the SEOW as it collaborates with state and local agencies, organizations and individuals to use data, skills and/or decision-making authority in guiding and promoting positive behavioral health; and
- document and institutionalize SEOW processes, including developing capacities for sustaining the SEOW, developing useful data products, disseminating such information to key decision makers and continually evaluating data and systems. This includes:
  - Developing a key set of indicators to describe the magnitude and distribution of substance-related consequences and consumption patterns across the state and in grantee communities of high need;
  - Developing a similar set of key indicators for prevention of mental illness and promotion of positive behavioral health across the state and in grantee communities of high need; and
  - Collecting, analyzing, interpreting, and communicating these data through the development of an epidemiological profile.

**Synar Program** - A requirement of the Federal Block Grant funding is the annual Synar survey. This survey is conducted by the DBH in collaboration with the Office of Alcoholic Beverage Control. The survey is conducted by ABC Officers and recruited youth who attempt to buy tobacco products from a number of randomly selected retailers. This year Kentucky's noncompliance rate was 5.4% - a slight decrease from last year's rate of 5.6% Kentucky's baseline rate in 1997 was 24%. This meant that 24% of the retailers surveyed sold tobacco products to underage youth. The requirement for the Block Grant compliance is that the state's non-compliance rate must be under 20% of the retailers or the state risks a loss of 40% of Block Grant funds. Starting in 1997, Kentucky's non-compliance rate has fallen from the baseline of 24% to this year's non-compliance rate of 5.7%. This rate is one of the lowest in the nation and is truly an accomplishment for Kentucky. While Kentucky's retail violation rates have greatly improved, youth still report that it is easy to obtain tobacco products from stores and from non-commercial sources such as an older friend, sibling or parent.

In terms of perceived availability of cigarettes, the longitudinal trend from Kentucky Incentives for Prevention Survey (KIP) 2003-2010 shows marginal, but steady decreases across all grade levels (6th, 8th, 10th and 12th). The most recent Kentucky data on perceived availability of cigarettes compares very favorably with the latest Monitoring the Future data. Nationally 55% of eight graders report that cigarettes are easy, or sort of easy to get, as compared to 41.9% of Kentucky 8th graders. Nationally, 76% of 10th graders report that cigarettes are easy to get while in Kentucky that figure stands at 63.8%. (See KIP Report Trend graph below)

## Accessibility : Cigarettes

Kentucky

Question 36 - How easy would it be for you to get some cigarettes?

Percent that answered 'Sort of easy' or 'Very easy'

Grade	2004	2006	2008	2010	2012
6	28.5%	28.6%	27.2%	25.9%	23.2%
8	52%	50.7%	48.8%	45.3%	41.9%
10	76.1%	73.1%	71.6%	67.8%	63.8%
12	89.9%	88%	86.9%	84.3%	81.4%

KIP SURVEY

71

Past 30 day use of smokeless tobacco as reported by the 2012 KIP survey also showed declines. Sixth grade use dropped from 2.7% in 2010 to 2% in 2012, 8<sup>th</sup> grade use decreased from 8.6% to 7%, 10<sup>th</sup> grade use saw the most dramatic decline – from 15.9% to 13.4% while 12<sup>th</sup> grade used decreased from 17.5% to 15.7%

**Tobacco Retail Underage Sales Training (TRUST)** - The TRUST tobacco vendor education program trained over 1000 tobacco vendors in its first year. We plan to double that figure by the end of the current state fiscal year.

**The Prevention Enhancement Sites (PES)** - The Prevention Enhancement Site (PES) system was created in 1998 through a State Incentive Grant from the Center for Substance Abuse Prevention (CSAP), to do research and provide technical assistance and training to Regional Prevention Centers and local coalitions on best practices in Alcohol, Tobacco and Other Drug (ATOD) abuse prevention.

The system consists of five sites, each with a particular area of expertise: alcohol, tobacco, marijuana, Fetal Alcohol Spectrum Disorder and faith-based initiatives.

The PES system serves Regional Prevention Centers, local prevention planning boards, Champions groups, faith-based groups and other local stakeholders. PES services are provided to prevention groups in Kentucky free of charge.

Working within the Strategic Prevention Framework process, the Prevention Enhancement Sites are instrumental in increasing the effectiveness of local community efforts to decrease the availability of alcohol, tobacco and other drugs. The following report highlights some of the major accomplishments of the Prevention Enhancement Sites for 2010-2011.

#### Alcohol PES:

- Developed The Alcohol Prevention Enhancement Site website – [www.kyprevention.com](http://www.kyprevention.com)
- Participation in and witnessing to the Governor’s Task Force on Alcohol
- Formation of the Kentucky Alcohol Policy Alliance

Products, services, policy changes or ordinances that occurred as a result of technical assistance/consultation with the PES:

1. City of Berea passed RBS ordinance
2. Four Rivers RPC –provided information and assistance on starting alcohol training along with doing environmental scans
3. Monroe Co. CARES-proved consultation on mobilizing community to recognize and increase enforcement of social host ordinance
4. KAPA –instrumental in creating the statewide advocacy group
5. Georgetown City Government-provided consultation and information that assisted in passing of Malt Beverage Keg Registration ordinance and expansion of RBS to meet city going wet.
6. Marion Co. High School FCCLA-provided resources and assistance in adoption of Sticker Shock project for youth group.

#### Faith-based PES:

- The Faith-based conference was held for the second year. Eleven out of 14 KY regions and 36 KY counties, as well as participants from Tennessee, Indiana and Ohio attended.
- 318 Faith Partners were trained this year. 148 were at the conference.
- Collaboration with the Kentucky Faith-based coalition
- Karen was a guest speaker on a national faith-based webinar
- Website activity increased. There were 837 web site visitors; 52 contacts called the FB PES 800 number listed on the web site; and 25 contacts used the web site form to contact the FB PES.

#### Fetal Alcohol Spectrum Disorder PES:

- Development of the on-line self-study, "Sex- Booze- Baby" currently being piloted at six colleges and universities. Under development –An Introduction to FASD for Professionals which will also be an online course.
- Created family support network. Currently 64 families are in the network with 38 families participating in family support group on Facebook.
- "Face + 1" document which teaches early child service providers how to recognize FASD in very young children. This was distributed to all First Steps and Early Head Start Providers.

Products, services, policy changes or ordinances that occurred as a result of ta/consultation with the PES:

The FASD PES is currently partnering with the treatment branch of DBH to conduct interviews and focus groups with hospitals, physicians and social workers around the state to guide DBH/DPH efforts to prevent substance exposed pregnancies

#### Marijuana PES:

- Partnered with the Office of Drug Control Policy to sponsor the Marijuana Summit for Kentucky. National trainers, Calvina Fay and Amy Ronshousen from Drug Free America Foundation presented. Thirty-two people attended. Three committees were formed to guide the work: Core Advisory Committee, Curriculum and Training committee and the Policy Committee.

Products, services, policy changes or ordinances that occurred as a result of ta/consultation with the PES:

Distribution of Project Alert curriculum to middle schools around the state. Two middle schools utilized Project Alert in spring semester 2013. Seven middle schools have received curricula to begin implementation in 2013-2014. Sixty-four kits along with MOU templates have been delivered to RPCs for implementation.

#### Tobacco PES:

- Worked with the Smoke Free Kentucky coalition to assist in their efforts to gain support for a statewide smoke-free law. The PES developed and produced 2500 legislative postcards that were distributed statewide.
- Coordinated the youth component of the Smoke Free Day at the Capitol. Approximately 80 youth and adult advisors from four schools received advocacy training, participated in the press conference and visited their legislators.
- Completed the development of the Smart Mouth curriculum that focuses on smokeless tobacco products. Two hundred copies have been produced for distribution across the state with a focus on the areas of greatest need according to the KIP survey.

Youth Empowerment System (Y.E.S.) - The goal of the Youth Empowerment System is to build capacity for Kentucky youth to plan, implement and evaluate substance abuse prevention strategies in their schools and communities. Y.E.S. is led by a steering committee composed of representatives from each of the Regional Prevention Centers. A primary responsibility of the Y.E.S. steering committee is to evaluate and fund yearly grant applications and plans submitted by youth groups across the state. This year the Substance Abuse Prevention Branch provided \$53,000 dollars to fund YES activities across the state.

KIDS NOW Plus - This program is mainly funded by Tobacco Settlement funds through the Governor's Office of Early Childhood in conjunction with a limited amount of Substance Abuse Prevention and Treatment Block Grant dollars. This funding primarily supports services to women experiencing high-risk pregnancies due to substance abuse in an effort to reduce negative birth outcomes such as low birth weight, prematurity and developmental delays.

Referrals to the program come from local public health departments, private doctors, school programs, and other community agencies who utilize a screening tool to refer pregnant women to the program. Services are provided in eight (8) community mental health regions of the state and include universal education classes for all pregnant women on the risk of substance use during pregnancy and the importance of abstinence; intensive prevention classes for pregnant women who have risk factors associated with an increased probability of developing a substance abuse problem across their lifetime; and intensive case management for pregnant women with current substance abuse or related problems.

The prevention classes play a key role in referring women to case management services. Here the higher risk women identify a plan to address their service needs. These needs typically include referrals for substance abuse treatment as well as mental health and domestic violence services. In addition, case managers typically connect the women with other community services such as prenatal care, housing, and food stamps. Follow-up after the birth is continued for two months.

Women who receive case management services complete a baseline and postpartum assessment. The baseline information is used for service planning with the women as well as data for evaluation of the program that is completed by the University of Kentucky Center for Drug and Alcohol Research. Frontline staff has been trained in the evidence-based practices of Motivational Interviewing, Intensive Case Management and the use of Motivational Incentives.

In FY 2013, the program outcomes included:

- 1,643 women received universal prevention education
- 241 women, with additional risk factors, received intensive prevention education

- 411 new pregnant women received case management services this year
- 9,381 individual case management contacts were made
- 411 pregnant women completed the baseline assessment tool and received a variety of clinical services and interventions based upon a very complex array of individual needs.

### [Family Resource Youth Services Coalition of Kentucky \(FRYSCKy\)](#) [\(Leslie Hall\)](#)

The FRYSCkY Coalition was established as a professional organization to enhance and promote the work of the Kentucky Family Resource and Youth Services Centers. The FRYSCkY Coalition promotes a network, including educators, family support practitioners and other human service providers, who strive to remove educational barriers to learning, in order to learn from each other, share resources and collaborate more effectively on behalf of families, children and youth.

The Kentucky Family Resource and Youth Services Centers were established as a component of the historic Kentucky Education Reform Act (KERA) of 1990. The mission of these school-based centers is to help academically at-risk students succeed in school by helping to minimize or eliminate non-cognitive barriers to learning.

These partnerships are critical in efforts on behalf of students to promote:

- early learning and successful transition to school;
- academic achievement and well-being; and
- graduation and transition into adult life.

Each center offers a unique blend of programs and services to serve the special needs of their students and families. Family Resource Centers address the needs of the elementary school population while the Youth Service Centers assists with Middle and High School students and families. Substance Abuse Prevention and Counseling is a **mandated** core component in the Youth Services Centers and is addressed by the Health Services and Referrals mandated component in many of the Family Resource Centers. FRYSC prevention efforts consist of campaigns, presentations, assemblies, Red Ribbon Week activities, Kick Butts Campaigns, student clubs, and brochures. Many of these programs are provided on an on-going basis.

The Youth Service Center that I work with was also a recipient of local GMH ASAP funding for programs at North Hardin High School in Radcliff, KY. Funding was utilized for Project Graduation which hosted 200 graduating seniors from the cities of Radcliff, Rineyville and Vine Grove. **Project Graduation** is a program in which organized, adult-supervised and alcohol/drug-free activities are offered after

graduation, instead of student sponsored events which could involve alcohol and/or drugs.

The FRYSCy Coalition and the Division of FRYSC assists with statewide prevention efforts through the professional trainings provided to center coordinators. Information gleaned from these trainings is disseminated throughout the state through the 800+ Family Resource and Youth Service Centers. Coordinators are also representatives on many local community agency boards. As an FRYSCy Coalition representative on the KY ASAP board I have reported prevention efforts and initiatives to both the FRYSCy Coalition and at the local FRYSC regional meeting.

### [Education, Kentucky Department of \(KDE\) \(Terry Holiday\)](#)

During Fiscal Year 2012, KDE created and published their first Annual Safe Schools Statistical Report, a task formerly accomplished by the Kentucky Center for School Safety. KDE took on this task when federal Title IV funding was discontinued. The report provides a summary of all behavior violations occurring in Kentucky schools, ***including those associated with drug, alcohol, and tobacco use by public school students.*** The 2011-12 report may be found on the KDE website at <http://education.ky.gov/school/sdfs/Documents/2011-12%20Safe%20Schools%20Annual%20Statistical%20Report.pdf>. For Fiscal Year 2013, the Annual Safe School Statistical report is still in process and will be published in early January. Safety Data for individual schools and districts may be found on KDE's main page at <http://education.ky.gov> under the Open House icon, in the School Report Cards, under the Learning Environment tab.

### [Kentucky Association of Regional Programs \(KARP\) \(Steve Shannon\)](#)

No Report Submitted

### [Kentucky Public Health Association \(Steve Bing\)](#)

KHDA and KPHA have been very active members of the Smoke Free Coalition supporting Forums around the Commonwealth as well as doing local level grassroots discussion in the respective locales the members serve. There have been local Board of Health anti-smoking resolutions passed by many LHDs as well as numerous discussions with local elected and business leaders. Through KPHA there were numerous petitions signed and letters written on the subject. As to other substance abuse issues each LHD(KHDA member) has worked to varying extents in their local community to be supportive from a public health perspective in education and treatment with other appropriate entities in the locale.

**Local Tobacco Addiction Substance Abuse Board – Law Enforcement – Buffalo Trace Local KY-ASAP Board – Maysfield Police Department (Chief Ronald J Rice)**

Maysville, like most Kentucky communities have an overwhelming drug problem. In Maysville, we feel the use, sell and transfer of illegal narcotics is the root cause of other criminal activity such as theft, burglary, robbery and domestic violence to name a few. In June of 2013 there was a significant spike in heroin cases in Maysville, 19 to date; marijuana possession 21, trafficking in controlled substances 65. Theft cases stand at 167, burglary 68 and robbery 4 all on the rise we feel due to the drug epidemic. HB-1 and others did a great job in reducing the access to prescription pills and making access more difficult, only to cause a spike in other illegal activity.

The link the department can realize between its mission and that of the KY-ASAP board is the significant decrease in the abuse, sell, and transfer of prescription pills. There is solid evidence that Maysville residents are no longer traveling several hundreds of miles outside the Commonwealth to obtain pain pill and return them to our area. In addition, with the coordination and cooperation of our local Buffalo Trace ASAP board as well as the state board, we feel their involvement in the area schools, their PSA's, programs, and drug tip hotline is instrumental in reaching a segment of the community that otherwise may not have been reached by the police department. The message these agencies are providing to the community concerning the hazards of heroin coupled with what the agency is currently involved, should, I anticipate, have a compelling impact on the current epidemic.

**Local Tobacco Addiction Substance Abuse Board – Daviess County Local KY-ASAP Board (Jeff Jones)**

No Report Submitted

**Private Community-Based Organizations - Cumberland River Comprehensive Care Center (Angela M. Hall)**

We are involved with the following community coalitions to provide technical advice using a science based program the Five (5) Strategic Prevention Framework (SPF) Steps: Assessment, Capacity Building, Planning, Implementation & Evaluation

### **Events & Developments**

- Trust Training in all eight counties for all tobacco vendors in 8 counties
- Assisted Bell County UNITE in developing and implementing their work plan
- Researched, developed and distributed Suicide Prevention educational materials in eight counties
- Developed KIDS NOW work plan
- Developed Regional Prevention Center (RPC) work plan
- Developed KIDS NOW spending plan
- Developed Regional Prevention Center (RPC) spending plan
- Distributed Inhalant prevention materials
- Developed and wrote Public Service Announcements (PSA's) on Suicide Prevention for all radio stations and newspapers in eight counties

- Hosted booth at Baby Fair and Baby Fest (KN & RPC)
- Hosted booth at Knox County Women's Health Fair (RPC & KN)
- Assisted with development and implementation of State Data System
- Developed Monitor, Educate, Dispose, Secure Rx medications (M.E.D.S.) with Agency for Substance Abuse Policy (ASAP)
- Ongoing research for statistical analysis, risk factors and emerging trends
- Develop and distribute marketing materials for KIDS NOW
- Develop and distribute marketing materials for Regional Prevention Center (RPC)
- Provided educational materials to KY State Representative regarding Equal Protection Act
- Beyond The Red Ribbon Presentation
- KIDS NOW Case management for Independence House (IH)
- Union College master's level School and Community Health Presentation
- Met with Knox County Court Designated Worker (CDW) distributed education materials and technical support
- Developed and implemented office tracking system for budget and staff accountability
- Sponsored and attended with a team of ASAP Board members the Advance Strategic Framework process workgroup
- Needs Assessment for Laurel County
- Needs Assessment for Knox County
- Healthy Babies Classes (2 hour classes) at:
  - Ray of Hope
  - Bell County High School
  - Bell County Health Department
  - Knox County Health Department
  - Harlan County Health Department
  - Laurel County Health Department
  - Whitley County (Corbin Health Department)
  - Clay County Health Department
- Contract with Self-Refined Clinic to provide suboxone to at risk pregnant women
- HIV Training (1x monthly) for new CRCCC employees
- Family Resource Youth Service Centers
- Healthy Babies Lunch & Learn
- Marketing KIDS NOW program (monthly re: fliers & face to face)
- Medicaid billing for KIDS NOW
- Stocked in house resource library with current statistics, visuals, curricula & various other educational materials
- Personal prescription lock boxes to hospitals, Dr's offices, pharmacies hospice, etc.
- Developed & distributed Changing Social Norms & Policy parent education booklet

## **Private Community-Based Organization - Knott Drug Abuse Council (Lola Patterson)**

**Mission/Goals** - The mission of the Knott Drug Abuse Council (KDAC) is to “reduce substance abuse among youth and overtime adults in Knott County”.

The goals of the Knott Drug Abuse Council is to reduce substance abuse among Knott County youth and over time reduce substance abuse among Knott County adults by addressing the community factors that increase the risk of substance abuse and promote the factors that minimize the risk of substance abuse while establishing and strengthening the collaboration among Knott County, private non-profit agencies, and federal, state, and local governments to support the efforts of the Knott County Drug Abuse Council to prevent and reduce substance abuse among our youth.

**Purpose** - The purpose of the Knott Drug Abuse Council is to work throughout all of Knott County for the prevention, education, and eradication of drugs and alcohol abuse.

### **Description -**

- ❖ July 2001 the Knott Drug Abuse council was formed.
- ❖ 2003 the council received 501(c)3 status.
- ❖ 2005 Executive Director hired.
- ❖ 2006 Administrative Assistant hired.
- ❖ 2008 Graduated from the CADCA National Coalition Academy
- ❖ 2009 KDAC partners with early intervention program.
- ❖ December 2009 Youth in Action program established.
- ❖ 2010 Stop Program Coordinator hired
- ❖ February 1, 2010 Town Hall Meeting held
- ❖ 2010 Carr Creek Elementary named UNITE Club of the Year
- ❖ 2011 Received National recognition for work on a round table discussion that included Congressman Hal Rogers, Gil Kerlikowske, Director of the Office of National Drug Control Policy, and Lola Patterson, Knott Drug Abuse Council Executive Director.
- ❖ 2011 Participated in the Sticker Shock Program at local businesses.
- ❖ 2011 Participated in the Ghost Out Even at Knott Central High School.
- ❖ 2011 Knott County Central High School named UNITE Club of the Year.
- ❖ 2011 Pain Clinic Ordinance passed in Knott County.
- ❖ 2011 Provided 2 “Take Back” days so residents could bring in unwanted or unneeded medication.
- ❖ 2011/ 2012 Provides extra DUI checkpoints on high traffic weekends such as Prom, Graduation and Gingerbread Festival
- ❖ 2012 Social Host Ordinance passed in Knott County.
- ❖ The Knott County Drug Abuse Council has successfully implemented a range of skill building and educational activities for youth and adults across Knott County. This includes Town Hall Meetings, Dad’s Day Out, Christmas with Kenny’s Kids, Back to School Bash, and Project Prom to name a few.

- ❖ 2012 Received recognition for 10 years participation in the KY-ASAP program.
- ❖ November 2012, Lola Patterson, Executive Director of the Knott Drug Abuse Council was appointed to the Kentucky Agency for Drug Abuse Policy by Governor Beshear.

**Funding** - The Knott Drug Abuse Council received its initial funding through the Kentucky Agency for Substance Abuse Policy. Currently, the Knott Drug Abuse Coalition receives funding through individual and corporate donations, as well as grants. KDAC continues to receive funding through KY-ASAP grants, as well as Operation Unite, Drug Free Communities Grant, and Sober Truth on Preventing Underage Drinking (STOP Act) Grant. The Knott Drug Abuse Council has been able to achieve monumental success through minimal operating funds indicating that the coalition is dedicated to achieving its mission of "reducing substance abuse among youth and overtime adults in Knott County".

### [Public Health, Kentucky Department for \(Stephanie Mayfield\)](#)

Tobacco use is the number one public health threat in Kentucky. Our adult and youth smoking rates, annual deaths related to smoking, and lung cancer death rates are among the highest in the country. Tobacco-related diseases cause more deaths in Kentucky and across the nation than AIDS, automobile accidents, homicides, suicides, alcohol, and illicit drug use combined.

The Tobacco Prevention and Cessation Program is primarily funded by Kentucky's Master Settlement Agreement (MSA). Approximately, eighty percent of Public Health MSA funds (for tobacco prevention and cessation) are distributed to local health departments. The Program also receives grant funds from the Centers for Disease Control and Prevention. Grant funds cover state staff, administrative costs, and a local grants program.

All local health departments have a Tobacco Prevention and Cessation Specialist whose activities include youth prevention education in schools, promoting smoking cessation, conducting community assessments, providing technical assistance to schools and businesses, and developing youth and adult coalitions to promote policy and environmental changes such as local smokefree ordinances.

The Tobacco Prevention and Control Program is an active partner on the KY-ASAP Board and at the local level (through local health departments) working together to reduce youth smoking, illegal sales to minors, promoting tobacco cessation including providing Nicotine Replacement Therapy (NRT), and supporting 100% Tobacco Free Schools.

#### 2013 highlights

- 2,035,637 Kentuckians (46.9%) have at least some degree of protection from secondhand smoke exposure in public places.

- Comprehensive smoke-free ordinances or regulations protect 1,482,699 Kentuckians, or 34.2% of our total population, from the harmful effects of secondhand smoke (SHS) exposure in public places and workplaces.
- Partial smoke-free policies containing exemptions from SHS protections cover an additional 12.7% of Kentuckians.
- Currently 396 schools in 32 school districts (1/3 of KY districts) have adopted a 100% Tobacco Free School Policy through the combined efforts of Coordinated School Health and Tobacco programs.
  - A 100% TFS policy prohibits tobacco use by staff, students, and visitors twenty-four hours a day, seven days a week, inside Board-owned buildings or vehicles, on school-owned property, and during school-sponsored student trips and activities.
- According to 2013 Youth Risk Behavior System (YRBS) survey, current smoking among Kentucky high school students has decreased from 24.1% in 2011 to 17.9% in 2013. Since 1997, the prevalence of high school smoking has decreased by 61.9%.
- Since 2002, Kentucky’s adult smoking rate has declined 13.2% to 28.3% in the 2012 BRFSS.
- In 2012, the 30-day quit rate at 12 months after Kentucky’s Quit Line (1-800-QuitNow) was 26.53%, an increase of 42.6% over the previous year.

Since 2012, Quit Now Kentucky has expanded services beyond traditional telephone coaching to enhanced, integrated services including:

- Web-based services    – E-referrals                      – E-messaging
- Text messaging            – Mobile app for Android and iPhone

## KY-ASAP: Partnership for a Drug-Free Kentucky

Beginning January 2008 the Kentucky Office of Drug Control Policy (ODCP) became an Affiliate/Alliance member with the Partnership for a Drug-Free America.

The Office of Drug Control Policy in collaboration with the Partnership for a Drug-Free America continues its statewide PSA campaign to bring professionally produced localized media messages to supportive media partners in a sustained effort to reduce the incidence of substance abuse in the Commonwealth. Our collaboration with the Partnership for a Drug-Free America continues to bring over \$6 million in professionally produced PSAs to Kentucky each year.

The tremendous benefits that we receive from the Partnership allow us to counter any and all negative messages with positive prevention strategies. This is an excellent opportunity for a positive story on another initiative KY-ASAP & the ODCP is doing to support the reduction of youth & adult substance use.

Addiction is the single greatest preventable illness in the country, and like other diseases, it affects not just the person with the illness but also family and friends. Ninety percent of addictions get started in their teenage years. Parents are more pressed for time than ever, and in addition to finding the time to talk with their children about the health risks of drugs and alcohol, they tell us they need new information, tools, support and help on what to say and do.

Because our mission is to serve as a leader and catalyst for improving the health and safety of all Kentuckians by promoting strategic approaches and collaboration to reduce drug use and related crime this is a perfect opportunity for the ODCP/KY-ASAP to collaborate and be apart of such an important and proactive issue.

The PSA's are powerful prevention messages that have gotten excellent media coverage this past year and have been an excellent opportunity for a positive story on another initiative the ODCP is doing to reduce substance abuse.

Parents and children are inundated with media messages about drug use and abuse among celebrities and major sports figures. The benefits we receive from these PSA's allowed ODCP to counter those negative messages with positive prevention messages.

ODCP/KY-ASAP continues to take advantage of the many collaborative opportunities and outreach responsibilities it has to share our mission regarding prevention, treatment, and law enforcement. It is necessary for us to be able to disseminate that information statewide.

ODCP has also collaborated with the local KY-ASAP boards across the Commonwealth to assist us in the distribution of the powerful PSA's to insure the message is disseminated across Kentucky.

## Treatment – Recovery Kentucky

---

[Recovery Kentucky](#) was created to help Kentuckians recover from substance abuse, which often leads to chronic homelessness. There are ten Recovery Kentucky centers across the Commonwealth. They are in Campbellsville, Erlanger, Florence, Harlan, Henderson, Hopkinsville, Morehead, Owensboro, Paducah, and Richmond. These centers provide housing and recovery services for up to 1,000 Kentuckians simultaneously across the state.

These recovery centers were designed to reduce the state's drug problem and resolve some of the state's homeless issues. They help people recover from addiction and help them gain control of their lives to eventually reside in permanent housing.

As supportive housing projects, each center uses a recovery program model that includes peer support, daily living skills classes, job responsibilities, and establishes new behaviors.

This type of supportive housing and recovery program is proven to help people who face the most complex challenges to live more stable, productive lives. It has been demonstrated successfully by both the Hope Center in Lexington and The Healing Place in Louisville, which were models for the program, and was named "A Model That Works" by the U.S. Department of Health and Human Services.

Without a stable place to live and a support system to help them address their underlying problems, most homeless people who also suffer from substance abuse and addiction bounce around between shelters, public hospitals, prisons, psychiatric institutions, and detoxification centers. Recovery Kentucky was designed to save Kentuckians millions in tax dollars that would have been spent on emergency room visits and jail costs.

Recovery Kentucky is a joint effort by the Department for Local Government (DLG), the Department of Corrections, and Kentucky Housing Corporation (KHC). These agencies developed a financial plan that has provided construction and operational financing, including a \$2.5 million annual allocation of Low Income Housing Tax Credits from KHC, which will generate a total equity investment of approximately \$20 million for construction costs. Operational funding includes approximately \$3 million from DLG's Community Development Block Grant program and approximately \$5 million from the Department of Corrections.

The local governments and communities at each Recovery Kentucky center location have also contributed greatly in making these centers a reality.

The Recovery Kentucky Task Force was created in 2008 to ensure the continued effectiveness and financial success of this initiative. The Recovery Kentucky Task Force continues to be a positive force in forwarding this important program.

Recovery Kentucky facilities are based on the recovery model developed in Kentucky by The Healing Place in Louisville. This model is based on concepts of mutual help – one addict helping another addict to find a path to recovery. These programs combine the opportunity of housing and safety while addressing the most common cause of homelessness-drug and alcohol addiction. The Healing Place is a nationally recognized model which has been replicated in several other areas including the Hope Center in Lexington. These programs are effective, cost efficient and inclusive for nearly all who request their services.

In 2004, the Office of Drug Control Policy was allocated funding to develop substance abuse recovery programs in local jails across the Commonwealth. Nine programs were funded as pilots in the initial round of funding. In the 2008 General Assembly, funding was appropriated to the Department of Corrections to provide residential services in the existing sixteen jail sites. The Department of Corrections is currently providing residential substance abuse recovery services to state inmates housed in selected county jails.
